## EXECUTIVE SUMMARY

This Phase I Environmental Site Assessment (ESA) was conducted by Family Environmental Compliance Services, Inc. (Family Environmental) and Expert Environmental Consulting, Inc. (Expert), at the direction of the City of Kansas City, Missouri (City), in accordance with the *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*, American Society of Testing Materials Designation: E 1527-05; and the Environmental Protection Agency's (EPA) All Appropriate Inquiry (AAI) regulation (40 Code of Federal Regulation (CFR) Part 312) for the property located at 300 East 39<sup>th</sup> Street, Kansas City, Missouri (Westport Middle School). The purpose of this Phase I ESA is to identify whether recognized environmental concerns (REC) are present on the property.

Westport Middle School (subject property) is currently developed with two structures, a skywalk, an adjoining parking lot structure, and a running track. The building is an unoccupied, four-story brick middle school that has reportedly been utilized as a school and as a teacher's community college. This property is currently owned by the Kansas City Missouri School District.

Mr. Pat Engles of Family Environmental and Mr. Keith Slider, of Expert conducted a comprehensive site reconnaissance of the subject property on September 23, 2010. Additionally, federal, state, regional, and local records were reviewed to assess whether the property or properties in the vicinity have undergone significant releases of hazardous substances or other events with potentially adverse environmental effects.

Family Environmental and Expert reviewed historic records, environmental databases, conducted site reconnaissance and performed interviews of appropriate individuals associated with the subject property. The subject property is located in a mostly residential area with single family residences. The history of ownership for this property throughout database searches indicated the subject property was utilized as a school from 1935 to present day. On REC in connection with the subject property was discovered upon completion of this Phase I ESA. The REC is as follows:

### ADJACENT PROPERTY RECS

- Westport High School, located at 315 East 39<sup>th</sup> Street and at 40<sup>th</sup> Street and McGee Street, Kansas City, Missouri, located one-eighth to one-quarter of a mile south-southeast of the subject property was listed in the UST, LUST, RCRA-Conditionally Exempt Small

Quantity Generator (CESQG), and FINDS databases. The FINDS Registry Identification number is listed as 110015908623. The RCRA-CESQG database lists this facility as a handler that generates 100 kg or less of hazardous waste per calendar month, and accumulates 1000 kg or less of hazardous waste at any time; or generates 1 kg or less of acutely hazardous waste per calendar month, and accumulates at any time; 1 kg or less of acutely hazardous waste; or 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste; or generates 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on and land or water, or acutely hazardous waste during and calendar month, and accumulates at any time; 1 kg or less of acutely hazardous waste; or 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste. The current RCRA-CESQG status is “No Violations Found”. The LUST release date was not reported. Media was listed as affected, but the type of media affected was not reported. The cleanup of the site was completed on June 29, 2009. Issuance of a NFA letter has not been reported for the LUST site by the MDNR. This site contained one UST that was removed from the site. The size, contents, date removed, date of NFA letter for this UST was not reported. No additional information concerning the LUST or UST listing was available. Based on the databases searched concerning the subject property, the non closure of the LUST listing, and the lack of information available for the UST, this site is considered a REC to the subject property.

Based on these findings, it is recommended that a Phase II be conducted at the site to verify if there is any contaminated soil associated with the south adjacent property, UST/LUST site, Westport High School.

# SECTION 1 INTRODUCTION

Family Environmental Compliance Services, Inc. (Family Environmental) was tasked by the City of Kansas City, Missouri (City), to conduct a Phase I Environmental Site Assessment (ESA) at Westport Middle School (subject property), located at 300 East 39<sup>th</sup> Street, Kansas City, Missouri. Family Environmental subcontracted portions of the Phase I ESA activities to Expert Environmental Consulting, Inc. (Expert). Field reconnaissance activities were conducted on September 23, 2010 by Mr. Pat Engles of Family Environmental and Mr. Keith Slider of Expert.

The Phase I ESA was conducted in accordance with the American Society of Testing Materials Standards E 1527-05, entitled: *Standard Practices for Environmental Site Assessments: Phase I Environmental Site Assessment Process*; and in conformance with, the Environmental Protection Agency's (EPA) *All Appropriate Inquiry* (AAI) regulation (40 CFR Part 312).

The subject property is currently developed with two structures, a skywalk, an adjoining parking lot structure, and a running track. The building on the subject property is currently unoccupied and was previously utilized as a teacher's community college (Appendix D). This property is currently owned by the Kansas City School District.

## 1.1 PURPOSE

The purpose of this Phase I ESA is to identify whether recognized environmental concerns (REC) are present on the property. RECs are the presence or likelihood of environmental concerns being present at the subject property, and may include any hazardous substances, or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater, or surface water of the subject property. The term (REC) includes: hazardous substances or petroleum products that are also under conditions that are in compliance with current laws. This term, REC, is not intended to include de minimis conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement

action if brought to the attention of appropriate governmental agencies (Section 1.1.1 E-1527-05, American Society for Testing and Materials [ASTM] 2005).

This Phase I ESA is in conformance with the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), which defines the practices that constitute “all appropriate inquiry into the previous ownership and uses of the property consistent with good customary practice,” as defined in 42 CFR Section 9601 (35)(B).

## **1.2 SCOPE OF WORK**

The scope of work (SOW), as defined by ASTM E 1527-05, entitled: *Environmental Site Assessments: Phase I Environmental Site Assessment Process*, is to identify whether RECs are present on the subject property. Phase I ESAs typically proceed in a four-phase process: (1) records review; (2) site reconnaissance; (3) interviews with current owners, occupants of the property, and local government agencies; and; (4) preparation of a report.

Any items listed in the ASTM method not expressly identified as present in the report can be assumed not present within the proposed subject property or within such distance to the proposed subject property as to be of potential concern to the proposed subject property. Additionally, any item mentioned but not identified as an REC can be assumed not an REC for the proposed subject property.

Deviations from ASTM 1527-05 are described in Section 10. Report limitations are described in Section 11. Additionally, the resume of the environmental assessors preparing the report is located in Appendix A.

## **1.3 INVOLVED PARTIES**

This Phase I ESA was conducted by Family Environmental and Expert. The Kansas City Missouri School District’s representative, Teresa Pacheco, accompanied the reconnaissance team on the site reconnaissance activities.

## **SECTION 2**

# **SITE DESCRIPTION AND PHYSICAL SETTING**

### **2.1 SITE DESCRIPTION**

The subject property is currently developed with two structures, a skywalk, an adjoining parking lot structure, and a running track. The building is currently an unoccupied four-story middle school and was previously utilized as a community college. This property is currently owned by the Kansas City School District.

### **2.2 PHYSICAL SETTING**

The subject property is depicted on the Kansas City Quadrangle, U.S. Geological Survey (USGS), 7.5-minute topographic series (1996) (see Appendix D). The subject property is located in the northwest quadrant of Section 20, Township 49 North, and Range 33 West. The approximate coordinates of the subject property are: 39° 3' 25.9" north latitude and 94° 34' 57.7" west longitude. Based on the most recent topographic map reviewed, the subject property is about 911 feet, above mean sea level. The topographic gradient of the property is generally north-northeast.

#### **2.2.1 Geologic Setting**

The subject property is located in Jackson County, Missouri. According to a USDA Jackson County, Missouri Soil Survey excerpt, the soils featured at the subject property represent the Urband land, Sibley, and Kennebec components. Theses soils have moderate infiltration rates with moderate to low steel corrosion potential. Surface water drainage is to the north-northeast with moderately well drained soils. Soil information can be located in Appendix H. Generally, depth to bedrock in this area is approximately 30 feet below ground surface. No readily available depth to water table information for the subject property was available at the time of this report.

#### **2.2.2 Hydrology**

The majority of surface water surrounding the subject property drains to the north-northeast into the city combined municipal storm water/sewer system. The annual mean precipitation is estimated at 33 to 44 inches. No groundwater gradient information was readily available for the subject property at the time of this report.

## SECTION 3 RECORDS REVIEW

### 3.1 REGULATORY AGENCY DATABASE REVIEW

Federal, state, regional, and local records were reviewed to assess whether the property or properties in the vicinity have undergone significant releases of hazardous substances or other events with potentially adverse environmental effects. EDR performed a database search of the property in accordance with current ASTM standards. A copy of this report is included as Appendix B.

The databases searched have been developed and are updated by federal, state, and local agencies and not Family Environmental or Expert and therefore should not be considered a “stand-alone document”. While these databases generally are reliable and comprehensive, cases do occur in which data are out of date and no longer reflect actual property conditions. Further, the information reflected in each report is based on data that was immediately, electronically retrievable (or reasonably ascertainable) at the time the subject property was targeted and evaluated by EDR.

Family Environmental conducted a review of the sites listed within the EDR Radius Map with GeoCheck<sup>®</sup> (EDR 2010a) within a quarter mile of the subject property to identify potential RECs. Results of the review are as follows:

- The subject property is located at 300 East 39<sup>th</sup> Street and is listed in the Federal Index System (FINDS) database. The FINDS Registry Identification number is listed for the subject property is 110036015335. This site is listed because the National Center for Education Statics (NCES) is the primary federal entity for collecting and analyzing data related to education in the United States and other nations and the institute of education sciences. No other listing for the subject property is listed. The FINDS NCES listing does not pose a REC to the subject property.
- An unknown address is listed at 39<sup>th</sup> and McGee Street, Kansas City, Missouri is located less than one-eighth of a mile south of the subject property and is listed in the Underground Storage Tank (UST) database. The current owner of this UST is listed as the Kansas City Missouri School District. The listed status of the UST is removed. The date the UST was last used was listed on February 4, 1991. A No Further Action (NFA) letter was issued for this UST by the Missouri Department of Natural Resource (MDNR) on March 14, 1991. No other information was available for this UST. Based on the removed status of the UST and the issuance of a NFA letter, this site does not pose a REC to the subject property.

- C.E.C. Realty, located at 3840 Warwick Boulevard, Kansas City, Missouri is located less than one-eighth of a mile west-northwest of the subject property and is listed in the UST and Leaking Underground Storage Tank (LUST) databases. This site reported a release on October 1, 1999. The cleanup completion date of this site was not reported. This site had been issued a MDNR NFA letter dated August 12, 2003. Soil was the media affected at this site. This site contained one 4,000 gallon steel gasoline UST that was removed from the site on July 14, 1999. Fine Environmental was the firm responsible for closing this UST. This UST received a NFA letter dated November 5, 1999. This site also contained three 4,000 gallon gasoline USTs that were permanently closed in place on January 1, 1984 by Fine Environmental. This site also contained one 4,000 gallon fiberglass gasoline UST that was removed from the site on February 1, 2002. Based on the removed USTs, closed in place USTs, and the MDNR NFA letter for the LUST, this site does not pose a REC to the subject property.
- George Barnhouse, located at 3832 Warwick Boulevard, Kansas City, Missouri is located less than one-eighth of a mile west-northwest of the subject property and is listed in the UST database. This site contains two 4,000 gallon steel USTs, one 6,000 gallon steel UST, one 4,000 gallon fiberglass UST, and one 550 gallon steel UST. All of these USTs have been permanently closed in place. The contents of the USTs, date closed, MDNR NFA letter all have not been reported. The topography in the area will not allow for potential contamination of this site to reach the subject property. Based on the closed in place status, distance, and topographic gradient to the subject property, this site does not pose a REC to the subject property.
- Southwestern Bell, located at 107 East 39<sup>th</sup> Street, Kansas City, Missouri is located less than one-eighth of a mile west-southwest of the subject property and is listed in the UST and Resource Conservation Recovery Act (RCRA)-Non Generator (NonGen) databases. This site contains one 2,175 gallon steel diesel UST that has been permanently closed in place by Unger Construction. This UST was last used on June 9, 1997 and was officially closed on February 15, 1999. This site was issued an MDNR NFA letter dated July 13, 1999. This site is also listed in the RCRA-NonGen database as presently not generating hazardous waste with no violations found. Based on the MDNR NFA letter and that this site does not presently generate hazardous waste, this site does not pose a REC to the subject property.
- Westport High School, located at 315 East 39<sup>th</sup> Street and at 40<sup>th</sup> Street and McGee Street, Kansas City, Missouri is located one-eighth to one-quarter of a mile south-southeast of the subject property is listed in the UST, LUST, RCRA-Conditionally Exempt Small Quantity Generator (CESQG), and FINDS databases. The FINDS Registry Identification number is listed as 110015908623. The RCRA-CESQG database lists this facility as a handler that generates 100 kg or less of hazardous waste per calendar month, and accumulates 1000 kg or less of hazardous waste at any time; or generates 1 kg or less of acutely hazardous waste per calendar month, and accumulates at any time; 1 kg or less of acutely hazardous waste; or 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste; or generates 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on

and land or water, or acutely hazardous waste during and calendar month, and accumulates at any time; 1 kg or less of acutely hazardous waste; or 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste. The current RCRA-CESQG status is “No Violations Found”. The LUST release date was not reported. Media was listed as affected, but the type of media affected was not reported. The cleanup of the site was completed on June 29, 2009. Issuance of a NFA letter has not been reported for the LUST site by the MDNR. This site contained one UST that was removed from the site. The size, contents, date removed, date of NFA letter for this UST was not reported. No additional information concerning the LUST or UST listing was available. Based on the databases searched concerning the subject property, the non closure of the LUST listing, and the lack of information available for the UST, this site is considered a REC to the subject property.

- C.E.C Realty Corporation, located at 100 East 39<sup>th</sup> Street, Kansas City, Missouri is located one-eighth to one-quarter of a mile west-southwest of the subject property is listed in the RCRA-NonGen, UST and LUST databases. The site reported a release on September 21, 1999. Cleanup of this site was completed on March 29, 2000. The MDNR issued a NFA letter on March 29, 2000. This site contained three 1,000 gallon steel gasoline USTs. All three USTs have been removed from the site. The firm responsible for closing this UST site was Fine Environmental. All three USTs were removed on September 16, 1999. The MDNR issued a NFA letter for these three USTs on September 16, 1999. This site is also listed in the RCRA-NonGen database as presently not generating hazardous waste. The RCRA-NonGen database lists this site as “no violations found”. Based on the removed USTs and associated MDNR NFA letter along with the “no violations found status”, this site does not pose a REC to the subject property.
- Westport Mobil, located at 3902 Main Street, Kansas city, Missouri is located one-eighth to one-quarter of a mile west-southwest of the subject property and is listed in the RCRA-NonGen database. This site is listed as presently not generating hazardous waste. The owner of this site is listed as Westport Mobil with a “no violations found status”. Based on the “no violations found status” and that this site presently does not generate hazardous waste, this site does not pose a REC to the subject property.
- Main Street Automotive, located at 3902 Main Street, Kansas City, Missouri is located one-eighth to one-quarter of a mile west-southwest of the subject property is listed in the UST database. This site contained two 10,000 gallon steel gasoline USTs and one 5,000 gallon steel gasoline UST. All three tanks were removed from the site on February 26, 1998. The firm responsible for closing this site was Hamilton Service. The MDNR issued a NFA letter for this site on February 26, 1998. Based on the removed status of the tanks and the MDNR issued NFA letter, this site does not pose a REC to the subject property.
- Motor Pool of Kansas City, Missouri, located at 3807 Main Street, Kansas City, Missouri is located one-eighth to one-quarter of a mile west-southwest of the subject property is listed in the RCRA-NonGen database. This site is listed as presently not generating hazardous waste. The owner of this site is listed as Motor Pool of Kansas City, Missouri with a “no violations found status”. Based on the “no violations found status” and that

this site presently does not generate hazardous waste, this site does not pose a REC to the subject property.

- Coldsnow Art Supply, located at 25 West 39<sup>th</sup> Street, Kansas City, Missouri is located one-eighth to one-quarter of a mile west-southwest of the subject property is listed in the Drycleaners, RCRA-NonGen, and UST databases. The Drycleaner database lists the site as DC number 02809. This site is not listed as a dry store, as a dry cleaning plant, supplier, or as a site that uses chlorinated and non-chlorinated solvents. The RCRA-NonGen database lists the site as not presently generating hazardous waste. The Historical Generator database lists this site as a small quantity generator (SQG) as producing corrosive hazardous waste and carbon tetrachloride with a “no violations found” status. This site is also listed in the UST database as having six 1,000 gallon steel gasoline USTs removed from this site. The USTs were removed from the site on July 19, 2005. ACT is the firm responsible for closing this site. The listing also makes note that dry cleaning fluids were thought to have been stored in the six USTs. Upon analysis of the on-site soils and tank contents, no detections of dry cleaning fluids were detected. Analytical method 8260 was utilized to detect dry cleaning fluids. Due to no detections, the MDNR issued a NFA letter on January 26, 2006 for this site. Due to the site not presently generating hazardous waste and the issuance of a MDNR NFA letter, this site does not pose a REC to the subject property.
- District 2 Maintenance Facility, located at 3915 Gillham Road, Kansas City, Missouri is located one-eighth to one-quarter of a mile southeast of the subject property and is listed in the UST, LUST and RCRA-NonGen databases. The current owner of this site is the Kansas City, Missouri Parks and Recreation Department. The LUST release date is listed on June 1, 1995. Cleanup of this site was completed on September 22, 1999. The date of the MDNR issued NFA letter is dated September 22, 1999. This site contained a total of one 6,000 gallon steel gasoline UST and one 6,000 gallon steel diesel UST. Both USTs were removed from the site on April 17, 1999. The firm responsible for closing this UST site was PSI. This UST site was issued a NFA letter dated April 17, 1999. The RCRA-Non-Gen database listing indicates that this site currently does not generate hazardous waste. This listing also is reported as “no violations found”. Based on the removed status of the UST and the issuance of a NFA for the UST and LUST and the RCRA-NonGen “no violation found” status, this site does not pose a REC to the subject property.
- Shell Food Mart, located at 3742 Main Street, Kansas City, Missouri, is located one-eighth to one-quarter of a mile northwest of the subject property and is listed in the Aboveground Storage Tank (AST) database. This site is listed as an active site with 24 dispensers, four cabinets, and 16 meters. This AST site is associated with the Main Street Shell also located at 3742 Main Street, Kansas City, Missouri. This site is located one-eighth to one-quarter of a mile northwest of the subject property and is listed in the UST database. This site is listed as having one 10,000 gallon steel gasoline UST, one 8,000 gallon steel gasoline UST, and one 4,000 gallon steel gasoline UST. All three of these USTs are currently in use and meet 1998 UST upgrade requirements. Because all the USTs listed meet the 1998 UST upgrade standards and the distance and topographic gradient between this site and the subject property, this site does not pose a REC to the subject property.

- 90 Minute Drycleaners, located at 3951 Main Street, Kansas City, Missouri is located one-eighth to one-quarter of a mile west of the subject property and is listed in the Drycleaners, Air Pollution Control Program Permits (AIRS), RCRA-SQG, and FINDS databases. This site is operating as a dry cleaning plant and the plant number is listed as 095-2136. This plant utilizes chlorinated solvents. The AIRS facility ID is listed as AP0000952136. The FINDS Registry Identification number for this site is listed as 110009414311. This facility is listed in the RCRA-SQG database as generating spent halogenated solvents. This site is also listed as violating state statutes or regulations in 2006, 2007, and 2009. State compliance has not been reported as achieved. Based on distance, and topographic gradient from this site to the subject property, this site does not pose a REC to the subject property.
- Westport Cleaners, located at 20 Westport Road, Kansas City, Missouri is located one-eighth to one-quarter of a mile west-southwest of the subject property and is listed in the Drycleaners, AIRS, RCRA-SQG, and FINDS databases. This site is operating as a dry cleaning plant and the plant number is listed as 095-2121. This plant utilizes chlorinated solvents. The AIRS facility ID is listed as AP0000952121. The FINDS Registry Identification number for this site is listed as 110001466075. This facility is listed in the RCRA-SQG database as generating spent halogenated solvents. This site is listed as having “no violations found” status. Based on “no violations found” status, distance, and topographic gradient to the subject property, this site does not pose a REC to the subject property.
- Former UST Site (Rudy Langer Property), located at 3626 Main Street, Kansas City, Missouri is located one-quarter to one-half of a mile north-northwest of the subject property and is listed in the UST and LUST databases. A release date was not reported, but soil was the affected media at this site. Cleanup of this site began on July 17, 2000 and was completed on July 17, 2000. A MDNR NFA letter was issued on July 19, 2000. No additional information was available for the UST located at this site. Based on distance, and topographic gradient from this site to the subject property, this site does not pose a REC to the subject property.
- St. Paul’s Episcopal Day School, located at 4043 Main Street, Kansas City, Missouri is located one-quarter to one-half of a mile south-southwest of the subject property and is listed in the UST and LUST databases. A release was reported at this site on March 31, 1993. Cleanup of this site was completed on May 26, 1993. The date of the MDNR NFA letter was not reported. No information was available as to the size, construction, contents, removal date, responsible firm closing the site, etc. Based on distance, and topographic gradient from this site to the subject property, this site does not pose a REC to the subject property.
- Shell, located at 3786 Broadway Street, Kansas City, Missouri is located one-quarter to one-half of a mile west of the subject property and is listed in the UST and LUST databases. A release date was not reported at this site. Cleanup of this site began on October 3, 1995. Completion of cleanup activities was not reported. This site was issued a MDNR No Further Remediation (NFR) letter on December 23, 2004. This site was sent to the MDNR archives on September 5, 2007. This site contained one 10,000 gallon

steel gasoline UST, one 8,000 gallon steel gasoline UST, two 7,500 gallon steel gasoline USTs, and one 6,000 gallon steel gasoline UST. All of these USTs were reportedly removed from the site on July 1, 2006 by Rick's Petro Service. No reported NFA letter was issued for these USTs. One 12,000 gallon fiberglass gasoline UST and one 6,000 gallon fiberglass gasoline UST are currently in use on this site and were installed on June 2, 2006. Based on distance and topographic gradient from this site to the subject property, this site does not pose a REC to the subject property.

- 101 Car Wash, located at 3537 Main Street, Kansas City, Missouri is located one-quarter to one-half of a mile north-northwest of the subject property and is listed in the UST LUST databases. A release was reported on this site on January 6, 1992 from a UST. Soil was the media affected by the release. Cleanup of this site began on January 6, 1992 and was reported as completed on June 10, 2008. This site has not reported a NFA from the MDNR and was administratively closed on June 10, 2008. This site reportedly contained two 10,000 gallon steel gasoline USTs and one 10,000 gallon steel diesel UST. In the comments section of this listing reportedly only two 6,000 gallon gasoline USTs and one 2,000 gallon diesel UST were removed. The firm responsible for closing this site is C.S. Ehinger. No additional information was available for this listing. Based on distance and topographic gradient from this site to the subject property, this site does not pose a REC to the subject property.
- Former Merchants Bank-Closed, located at 3756 Broadway Street, Kansas City, Missouri is located one-quarter to one-half of a mile west-northwest of the subject property and is listed in the UST, LUST, and State of Missouri Spills databases. A release was reported on this site on August 1, 1994. Cleanup of this site has not been reported. Historical soil contamination was discovered during UST removal. The tanks have not been used since 1960. MDNR issued closure letter on October 13, 1994. This site contained one 3,330 gallon gasoline UST and one 2,500 gasoline UST. The construction material these USTs consisted of was not reported. Huntingdon Engineering was the firm responsible for closing this site. This site is also listed in the Missouri Spills database. The spill number allocated for this site is listed as 9408181528BJA. The date the spill was reported was on August 18, 1994 at 3:28PM. The cause of the release was determined to be a leaking tank system. The caller reporting the spill discovered soil contamination during a UST removal. The response to the spill included the excavation and disposal of the affected soil. The MDNR LUST Unit oversaw the closure. No additional information was listed in the Spills database. Based on distance, topographic gradient and that the MDNR LUST Unit oversaw UST closure, this site does not pose a REC to the subject property.
- Westport Facility, located at 331 Westport Road, Kansas City, Missouri is located one-quarter to one-half of a mile west-southwest of the subject property and is listed in the UST and LUST databases. The release date was not reported for this site. The cleanup of this site began on December 29, 2004 and was completed on February 24, 2009. No additional information was listed for the UST. Based on distance, and topographic gradient from this site to the subject property, this site does not pose a REC to the subject property.
- Westport BP, located at 4004 Broadway Street, Kansas City, Missouri is located one-quarter to one-half of a mile west-southwest of the subject property and is listed in the

UST, LUST, and Spills databases. A release was reported for this site on August 12, 1991. Soil was the media affected by the release. Cleanup of the site began on August 12, 1991 and was completed on October 25, 1991. After numerous groundwater monitoring events on this site, well abandonment was recommended on January 16, 2004. This LUST incident was closed and a MDNR NFA was issued on February 5, 2004. This site contained one 10,000 gallon steel gasoline UST, two 8,000 gallon steel gasoline USTs, and one 500 gallon steel used-oil UST. The 10,000 gallon UST and the two 8,000 gallon USTs were closed by Eneco Tech. These three USTs were removed from the site on August 12, 1991. The 500 gallon used-oil UST was removed from the site on January 1, 1989. The firm closing this tank was not reported. No NFA letter has been reportedly issued for the removed USTs. A total of three 12,000 gallon steel gasoline USTs and one 560 gallon used-oil UST are currently in use in this site. All four of these USTs meet the 1998 UST standards. No additional UST information was listed. This site was also listed in the MO Spills database. The spill was reported on February 8, 2002 at 11:13AM. This spill number issued for this site is listed as 0202081113ADC. The cause of the spill was determined to be from a leaking tank system. This incident was turned over to the MDNR Hazardous Waste Program's Tanks Section. Based on distance, and topographic gradient from this site to the subject property, this site does not pose a REC to the subject property.

- New Plaza Pontiac/BMW Dealership, located at 4200 Main Street, Kansas City, Missouri is located one-quarter to one-half of a mile south-southwest of the subject property and is listed in the UST and LUST databases. A release was reported at this site on April 23, 1991. Cleanup of this site was completed on February 23, 1993. A MDNR NFA letter date was not reported. This site contained one 4,000 gallon steel gasoline UST and one 300 gallon steel used-oil UST. Both USTs were removed on February 26, 1993 and a MDNR NFA letter was issued on February 26, 1993. Based on the MDNR issued NFA letter, distance, and topographic gradient from this site to the subject property, this site does not pose a REC to the subject property.
- Due to poor or inadequate address information, 20 orphan sites are listed in the EDR report, Orphan Summary. Family Environmental and Expert reviewed these address listings and compared them to the area for which the subject property is located. The following assumption can be made concerning the Orphan Summary: either the addresses are located outside the recommended ASTM search distance or the addresses do not exist. These sites were either cross-gradient, down-gradient, or closed sites. After field verification, no RECs were identified based on the orphan summary review.

### **3.2 HISTORICAL USE INFORMATION**

Historical data about the subject property and surrounding area were gathered to determine past uses and potential RECs. The following sections describe aerial photographs, topographic maps, city directories, and previous Phase I reports available for the subject property.

### 3.2.1 Aerial Photographs

The EDR Aerial Photo Decade Package (EDR 2010b) returned twelve historic aerial photographs of the subject property and surrounding properties. See Appendix C for all historic aerial photographs.

EDR conducted a search of aerial photographs for the subject property. EDR returned aerial photographs for the years 1948, 1952, 1957, 1963, 1969, 1975, 1979, 1983, 1986, 1991, 2002, 2005 and 2006. The current structure appears in all aerials provided by EDR. No RECs were observed in the abovementioned aerial photographs. Appendix C provides a depiction of each aerial photograph. A brief analysis is provided below:

Aerial Photograph Year(s)	Description
1948, 1952, and 1957	The subject property is depicted on these aerial photographs as one large structure. The surrounding properties appear to be residential. The south adjacent property appears to be Westport high School. No RECs were observed based on review of these aerial photographs.
1963 and 1969	The subject property appears to be the same as in the previous photos. An adjoining area directly west of the subject property appears to have been cleared. This area is where a future parking garage structure will appear in 1991. Westport High School still appears to the south. The surrounding properties appear to be mainly residential with commercial developments approximately three blocks west of the subject property. No RECs were identified based on review of these aerial photographs.
1975, 1979, and 1986	The subject property appears to be the same as in the previous photos. Westport High School still appears to the south. The surrounding properties appear to be mainly residential with commercial developments approximately three blocks west of the subject property. No RECs were identified based on review of these aerial photographs.
1991	This aerial photograph depicts the subject property with the current structure and a parking structure attached to the west portion of the property. The surrounding properties appear to be the same as depicted in the 1986 photograph. No RECs were identified based on review of this aerial photograph.
2002, 2005, and 2005	These aerial photographs depict the subject property with the current structure and a parking structure attached to the west portion of the property. The surrounding properties appear to be the same as depicted in the 1991 photograph. No RECs were identified based on review of this aerial photograph.

### 3.2.2 Sanborn® Map Report

EDR (EDR 2010e) conducted a search for historical fire insurance maps; three maps dated 1895, 1909; 1951; and 1963 were available (see Appendix D). No RECs were observed in connection with the Sanborn® Map review. Appendix D provides each Sanborn® Map. A brief description of each Sanborn® map is provided below:

Sanborn® Map Year(s)	Description
1895	Half of the subject property is depicted with one residential structure. The surrounding properties appear to be residential dwellings. No RECs were observed during this Sanborn® Map review for the subject property or surrounding properties.
1909	The entire subject property is depicted between Warwick Boulevard and Gillham/McGee Streets. The western half of the subject property shows Ward Public School followed by three residential dwellings to the east up to Gillham/McGee Streets. Three additional dwellings are depicted east of Gillham/McGee Streets where Westport Middle School will eventually be constructed. The south adjacent property appears to be Westport High School. The surrounding properties appear to be residential dwellings. No RECs were observed during this Sanborn® Map review for the subject property or surrounding properties.
1951	The western half of the subject property is depicted as John Harris Subdivision of Lot 1 followed by three residential dwelling between Warwick Boulevard and Gillham/McGee Streets. The eastern half of the subject property is depicted as Junior & Teacher College building east of Gillham/McGee Streets. The south adjacent property appears to be Westport High School. The surrounding properties appear to be residential dwellings. No RECs were observed during this Sanborn® Map review for the subject property or surrounding properties.
1963	The western half of the subject property is depicted as John Harris Sub Division of Lot 1 with no dwellings or structures present between Warwick Boulevard and Gillham/McGee Streets. The eastern half of the subject property is depicted as Junior & Teacher College building east of Gillham/McGee Streets. The south adjacent property appears to be Westport High School. The surrounding properties appear to be residential dwellings. No RECs were observed during this Sanborn® Map review for the subject property or surrounding properties.

### 3.2.3 Historical Topographic Maps

EDR conducted a search for historical topographic maps; seven maps dated: 1894, 1940, 1948, 1957, 1964, 1970, 1975, 1991, and 1996 were available (see Appendix D). No significant changes were observed in the topographic maps mentioned above.

Topographic Map Year(s)	Description
1894	This topographic map shows a general overview of the Kansas and Missouri areas along the stateliness depicting streets and railroads. No RECs were observed after review of this topographic map.
1940 and 1948	These topographic maps depict the subject property building and the south adjacent building labeled as Westport High Schools. Very few other structures are present on this map. No RECs were observed after review of these topographic maps.
1957	This topographic map depicts the subject property building as Kansas City Junior College and the South adjacent property as Westport High school. Very few other structures are depicted in the surrounding area. No RECs were observed after review of this topographic map.
1964, 1970, and 1975	These topographic maps depict the subject property building as Metropolitan Junior College and the south adjacent property as Westport High School. Very few other structures are depicted in the surrounding area. No RECs were observed after review of this topographic map.
1991 and 1996	These topographic maps show the subject property in a developed area of Kansas City, Missouri. No structures are depicted on these maps for the subject property or surrounding properties. No RECs were observed after review of these topographic maps.

### 3.2.4 City Directories

Family Environmental reviewed the City Directory from EDR (EDR 2010d), which covered listings in City Directories for relevant portions of the subject property and surrounding properties in the following years 1920, 1925, 1930, 1935, 1940, 1945, 1951, 1956, 1961, 1966, 1970, 1975, 1980, 1985, 1990, 1995, and 2006.

Subject Property City Directory Listing	Description
1935 through 1940	The subject property is listed as Westport Junior High School at 3845 McGee Street, Kansas City, Missouri.
1945 through 1956	The subject property is listed as Junior College at 3845 McGee Street, Kansas City, Missouri.

1961	The subject property is listed as Junior College of Kansas City at 3845 McGee Street, Kansas City, Missouri.
1966	The subject property is listed as Metropolitan Junior College at 3845 McGee Street, Kansas City, Missouri.
1970	The subject property is listed as Manuel High School at 3845 McGee Street, Kansas City, Missouri.
1975	The subject property is listed as Manual High School at 3845 McGee Street, Kansas City, Missouri.
1980 through 1985	The subject property is listed as Westport Junior High School at 3845 McGee Street, Kansas City, Missouri.
1990	The subject property is listed as Westport Middle School at 3845 McGee Street, Kansas City, Missouri.
2000 through 2006	The subject property is listed as Westport Middle School at 300 East 39 <sup>th</sup> Street, Kansas City, Missouri from 2000 to 2006.

<b>Surrounding Property City Directory Listings</b>	<b>Description</b>
East 39 <sup>th</sup> Street	Numerous residences are listed from 1920 through 2006. Also listed in the area is a music studio from 1951 through 1956, a school supply store from 1930 through 1966, a restaurant from 1930 through 1956, Brewer Printing from 1945 through 1956, and Quick Trip from 1975 through 1990.
Gillham Road	Numerous residences are listed from 1922 through 2006. Pilgrim Lutheran is listed from 1945 through 2006.
Harrison Boulevard	Several residences are listed for the year 1985.
Locust Street	Residences are listed from 1920 through 1990.
McGee Street	Numerous residences (single family and multi-family) are listed from 1935 through 1995. The subject property is listed from 1935 through 1990. Westport rest home was listed from 1956 through 1985.
Oak Street	Numerous residences (single family and multi-family) are listed from 1920 through 1990.
Warwick Boulevard	Numerous residences (single family and multi-family) are listed from 1920 through 2006.

There were numerous residential listings throughout the city directory search. Not all addresses could be listed. The table above offers a brief overview of the main commercial businesses listed in the city directory search. No RECs were identified based on a review of the city directory search in connection with the subject property. Appendix D contains more details of the city directory search.

### **3.2.5 Previous Environmental Reports**

Family Environmental received a KCMSD Triennial Re-inspection report from Mr. Matt Levy, a representative of the school district. This Triennial Re-inspection report is not comprehensive in nature and only describes asbestos containing materials (ACM) that are located in the building. This report also details the approximate quantity and condition of the ACM. No other environmental reports were provided to Family Environmental for review for this Phase I ESA.

## **SECTION 4**

# **ENVIRONMENTAL LIEN AND TITLE INFORMATION**

### **4.1.1 Environmental Lien Search Report**

Family Environmental reviewed the Environmental Liens and Search Report from EDR (EDR 2010f). This report showed that three general warranty deeds exist and the titles are vested in The School District of Kansas City, Missouri Building Corporation. The first warranty deed is dated October 1, 1990 and was recorded on December 5, 1990. This deed is located in book 2080 on page 881. The second warranty deed is dated June 1, 1991 and was recorded on June 17, 1991. This deed is located in Book 2134 on page 1000. The third warranty deed is dated July 5, 1991 and was recorded on August 6, 1991. No environmental liens or other activity and use limitations were listed for the subject property (see Appendix D). No RECs were identified based on the environmental lien and title information.

## **SECTION 5 PROPERTY TAX MAP**

### **5.1.1 Property Tax Map Report**

Family Environmental received tax information from EDR. The Tax Map report depicted the subject property bounded by East 38<sup>th</sup> Street to the north, East 39<sup>th</sup> Street to the south, Gillham Road to the east, and Warwick Boulevard to west. The subject property is listed on map number 30-220 of the Assessment of Jackson County, Missouri in the southeastern most lower corner of the map. The Property Tax Map Report is located in Appendix F. No RECs were identified based on a review of the Property Tax Map Report.

## **SECTION 6 SITE RECONNAISSANCE**

Mr. Pat Engles of Family Environmental and Mr. Keith Slider of Expert conducted a comprehensive site reconnaissance visit of the subject property on September 23, 2010. Ms. Teresa Pacheco, Kansas City School District Representative, accompanied the reconnaissance team on the site reconnaissance activities. Observations made during the site reconnaissance are described below and were noted during the site reconnaissance (see Appendix G). All areas of the subject property were accessible for reconnaissance. As site access manager, Ms. Pacheco provided additional information described in Section 7, Interviews. Photographic documentation of the site reconnaissance is in Appendix H.

### **6.1 GENERAL SITE SETTING AND OBSERVATIONS**

The following sections describe the subject property's current use and exterior and interior features.

#### **6.1.1 Site Description**

The subject property is located at 300 E. 39<sup>th</sup> Street, Kansas City, Missouri. The subject property is bound by East 38<sup>th</sup> Street to the north, East 39<sup>th</sup> Street to the south, Gillham Road to the east, and Warwick Boulevard to west. Surrounding the site includes: Immediately north of the subject property are single-family residences and multi-family residences. Immediately south and east of the subject property are a high school and mixed commercial/residential areas consisting of single family and multi-family residences. Immediately west of the subject property are single family residences.

#### **6.1.2 Current Site Use**

The subject property is currently developed with two structures, a skywalk, an adjoining parking lot structure, and a running track. The building is an unoccupied, four-story middle school and was previously used as a college. This property is currently owned by the Kansas City School District.

#### **6.1.3 Exterior Observations**

The structure is currently a four story unoccupied building. All windows and doors of the subject property appeared to be in good condition. The overall upkeep of subject property appeared to be in good condition.

#### **6.1.4 Interior Observations**

Access to all of the interior rooms and the roof of the subject property structure were available during the site visit. The subject property appeared to be secure and intact. Family Environmental and Expert observed mechanical rooms, a cafeteria/kitchen, class rooms, office spaces, two gymnasiums, a library and an auditorium.

### **6.2 SPECIFIC RECONNAISSANCE ITEMS**

The following sections are related to observed reconnaissance items.

#### **6.2.1 Hazardous Substances and Petroleum Products**

No hazardous substances or petroleum products were observed on the exterior of the property. The interior of the building contains an elevator that was previously powered by hydraulic oil. Additionally, quantities of industrial grade cleaning supplies and latex paint were observed throughout. These chemicals pose an environmental concern, however, de minimus. Additionally, quantities of chemicals used for chemistry, biology, physics and earth science courses were identified. Though these chemicals are considered incidental to teaching operations, it is necessary to report them given their class, type, and quantity. It should however be noted that no evidence of spills, staining, or leakage were observed.

#### **6.2.2 Hazardous Waste**

No evidence of storage or discharge of hazardous waste was observed during site reconnaissance of the subject property.

#### **6.2.3 Landfills, Dumps, Burials, or Solid Waste Disposal**

No landfills, dumps, evidence of burial activities, or solid waste disposal (with the exception of limited domestic littering and domestic trash in drums) were observed on the exterior of the subject property. Additionally, the property appeared secured and intact (Photograph 3 and 4).

#### **6.2.4 Storage Tanks**

##### **Aboveground Storage Tanks**

No ASTs were observed on the subject property.

### **Underground Storage Tanks**

No USTs were observed on the subject property.

### **Drums or Other Containers**

Drums of domestic trash were present on the site.

#### **6.2.5 Polychlorinated Biphenyl-Containing Equipment**

Assumed PCB containing materials were observed on the subject property. Several light ballasts were observed in the mechanical room. It is presumed that these and the light ballasts associated with the functioning lighting systems in the building contain PCBs until further testing demonstrates otherwise. All transformers observed were marked with “No PCBs” stickers and therefore, are not considered RECs to the subject property.

#### **6.2.6 Heating, Ventilation, and Air Conditioning System and Fuel Source**

The building HVAC system is currently being controlled by electric powered motors supplying air conditioning to the building.

#### **6.2.7 Drains, Sumps, Pits, Cisterns, and Cesspools**

No sumps, pits, cisterns, or cesspools were observed on the subject property. Family Environmental did observe numerous floor drains in the building.

#### **6.2.8 Ponds, and Lagoons**

No ponds, lagoons, or open pools likely to contain hazardous substance or petroleum products or waste were observed on the subject property.

#### **6.2.9 Stains or Corrosion on Soil or Pavement**

No staining or corrosion was observed on soil or pavement on the subject property.

#### **6.2.10 Areas of Dead, Distressed, Discolored, or Stained Vegetation**

No areas of dead, distressed, discolored, or stained vegetation were observed on the subject property.

#### **6.2.11 Possible Fill or Grading**

No evidence of possible fill or grading was observed during the site visit.

#### **6.2.12 Storm Water**

No ditches or streams were observed on the subject property. The storm water drains naturally onto the subject property and then heads southwest toward the city combined storm sewer drain system.

#### **6.2.13 Wells and Potable Water Supply**

No irrigation, public water supply, private water supply, or injection wells were observed on the subject property.

#### **6.2.14 Lead-Based Paint**

Inspecting for lead-based paint is outside the scope of services in performing this Phase I Environmental Site Assessment and not required by ASTM E-1527-05. Future work planned for this building includes completing a “Hazardous Materials Survey” which includes the testing of ACM, lead-based paint, and quantifying containerized household hazardous waste.

#### **6.2.15 Asbestos-Containing Building Materials**

Inspecting for lead-based paint is outside the scope of services in performing this Phase I Environmental Site Assessment and not required by ASTM E-1527-05. Future work planned for this building includes completing a “Hazardous Materials Survey” which includes the testing of ACM, lead-based paint, and quantifying containerized household hazardous waste.

#### **6.2.16 Radon**

Testing for radon gas is beyond the scope of this Phase I ESA and not required by ASTM E-1527-05.

#### **6.2.17 Other Site-specific Environmental Conditions**

No other site-specific environmental conditions were noted during the site reconnaissance.

### 6.3 VICINITY RECONNAISSANCE

The subject property is located a historic residential area of Kansas City, Missouri. No RECs were observed in the immediate vicinity.

#### 6.3.1 Adjacent Properties

Direction	Description
North	Single family residential properties were observed. No RECs were observed.
South	Westport High School and single family residential properties were observed. No RECs were observed.
East	Gillham Road and single family residential properties were observed. No RECs were observed.
West	Warwick Boulevard and single family residential properties were observed followed by intermittent commercial businesses. No RECs were observed.

#### 6.3.2 Potential for Contamination from Adjacent Properties

No other areas of potential contamination were observed on adjacent properties during site reconnaissance. During the historical database review, Westport High School, located at 315 East 39<sup>th</sup> Street and at 40<sup>th</sup> Street and McGee Street, Kansas City, Missouri, located one-eighth to one-quarter of a mile south-southeast of the subject property was listed in the UST, LUST, RCRA-Conditionally Exempt Small Quantity Generator (CESQG), and FINDS databases. The FINDS Registry Identification number is listed as 110015908623. The RCRA-CESQG database lists this facility as a handler that generates 100 kg or less of hazardous waste per calendar month, and accumulates 1000 kg or less of hazardous waste at any time; or generates 1 kg or less of acutely hazardous waste per calendar month, and accumulates at any time; 1 kg or less of acutely hazardous waste; or 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste; or generates 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on and land or water, or acutely hazardous waste during and calendar month, and accumulates at any time; 1 kg or less of acutely hazardous waste; or 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste. The current RCRA-CESQG status is “No Violations Found”. The LUST release date was not reported. Media was listed as affected, but the type of media affected was not reported. The cleanup of the site was completed on June 29, 2009. Issuance of a NFA letter has not

been reported for the LUST site by the MDNR. This site contained one UST that was removed from the site. The size, contents, date removed, date of NFA letter for this UST was not reported. No additional information concerning the LUST or UST listing was available. Based on the databases searched concerning the subject property, the non closure of the LUST listing, and the lack of information available for the UST, this site is considered a REC to the subject property.

## **SECTION 7 INTERVIEWS**

The objective of the interviews is to obtain information concerning RECs in connection with the subject property. This information was either obtained from the TSQ in Appendix G or conveyed verbally, as indicated below.

### **7.1 INTERVIEW WITH OWNER**

Ms. Teresa Pacheco, Kansas City School District Representative, provided Expert with details regarding the site and answered all questions relating to the subject property. Specific questions were asked regarding: her knowledge of environmental concerns (with the exception of ACM); chemical usage; environmental violations (if any); existing environmental reports (with the exception of ACM); underground storage tanks at the subject property; among others. It should be noted that with the exception of ACM surveys, no other environmental reports or concerns were believed to be in existence. Findings during this interview indicated no significant deviations of the subject property's intended use as a school building. Further findings regarding this interview are provided in Appendix G of this report.

Additionally, Expert personnel contacted the Kansas City Fire Marshall's Office and MDNR for additional information on the subject property, if any. No additional information was available. Further findings regarding these interviews are provided in Appendix G of this report.

## SECTION 8 FINDINGS

Family Environmental and Expert reviewed historic records, environmental databases, conducted site reconnaissance and performed interviews of appropriate individuals associated with the subject property. The subject property is located in a mostly residential area with single family residences. The history of ownership for this property throughout database searches indicated the subject property was utilized as a school from 1935 to present day. On REC in connection with the subject property was discovered upon completion of this Phase I ESA. The REC is as follows:

### 8.1 ADJACENT PROPERTY RECS

- Westport High School, located at 315 East 39<sup>th</sup> Street and at 40<sup>th</sup> Street and McGee Street, Kansas City, Missouri, located one-eighth to one-quarter of a mile south-southeast of the subject property was listed in the UST, LUST, RCRA-Conditionally Exempt Small Quantity Generator (CESQG), and FINDS databases. The FINDS Registry Identification number is listed as 110015908623. The RCRA-CESQG database lists this facility as a handler that generates 100 kg or less of hazardous waste per calendar month, and accumulates 1000 kg or less of hazardous waste at any time; or generates 1 kg or less of acutely hazardous waste per calendar month, and accumulates at any time; 1 kg or less of acutely hazardous waste; or 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste; or generates 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on and land or water, or acutely hazardous waste during and calendar month, and accumulates at any time; 1 kg or less of acutely hazardous waste; or 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste. The current RCRA-CESQG status is “No Violations Found”. The LUST release date was not reported. Media was listed as affected, but the type of media affected was not reported. The cleanup of the site was completed on June 29, 2009. Issuance of a NFA letter has not been reported for the LUST site by the MDNR. This site contained one UST that was removed from the site. The size, contents, date removed, date of NFA letter for this UST was not reported. No additional information concerning the LUST or UST listing was available. Based on the databases searched concerning the subject property, the non closure of the LUST listing, and the lack of information available for the UST, this site is considered a REC to the subject property.

## **SECTION 9**

# **CONCLUSIONS AND RECOMMENDATIONS**

Family Environmental has performed a Phase I ESA in compliance with the scope and limitations of ASTM Practice E 1527-05 for the property located at 300 East 39<sup>th</sup> Street, Kansas City, Missouri. Any exceptions to or deviations from this practice are described in Section 10 of this report. This Phase I ESA has revealed one REC in connection with this property and surrounding properties, based on: review of available data of subject property and adjacent properties; site reconnaissance, and interviews conducted with subject property personnel.

Based on these findings, it is recommended that a Phase II be conducted at the site to verify if there is any contaminated soil associated with the south adjacent property, UST/LUST site, Westport High School.

## **SECTION 10 DEVIATIONS**

No deviations from ASTM E 1527-05 occurred during the preparation of this Phase I ESA.

## SECTION 11

# DECLARATIONS OF ENVIRONMENTAL PROFESSIONAL

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in 40 CFR §312.10. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Name (printed): Keith Slider

Title: Environmental Professional

Date: December 31, 2010

## SECTION 12 LIMITATIONS

This report was compiled based partially on information supplied to Family Environmental and Expert from outside sources and other information in the public domain. The conclusions and opinions herein are based on the information Family Environmental and Expert obtained in compiling this report. This information is on file at Family Environmental's office in Kansas City, Missouri. Family Environmental makes no warranty as to the accuracy of statements made by others which may be contained in the report, nor are any other warranties or guarantees, expressed or implied, included or intended by the report except that it has been prepared in accordance with the current generally accepted practices and standards consistent with the level of care and skill exercised under similar circumstances by other professional consultants or firms performing the same or similar services. Because the facts forming the basis for the report are subject to professional interpretation, differing conclusions could be reached. Family Environmental does not assume responsibility for the discovery and elimination of hazards that could possibly cause accidents, injuries, or damage. Compliance with submitted recommendations or suggestions does not assure elimination of hazards or the fulfillment of client's obligations under local, state, or federal laws or any modifications or changes to such laws. None of the work performed hereunder shall constitute or be represented as a legal opinion of any kind or nature, but shall be a representation of findings of fact from records examined.

We appreciate the opportunity to work with you on this project. If you have any questions concerning the findings and conclusions contained in this report, please contact Mr. Michael Dustman at (816) 527-0101.

(6 PAGES)**

**MICHAEL E. DUSTMAN**  
**REGIONAL OPERATIONS MANAGER**

---

**SPECIALTIES**

- i Phase I and Phase II ESAs
- i Air Monitoring
- i Asbestos Inspections
- i Asbestos Project Design
- i Asbestos Abatement Oversight
- i Mold Air Sampling
- i Mold Remedial Design
- i Mold Abatement Oversight
- i Lead-Based Paint Inspections
- i Lead-Based Paint Risk Assessments
- i Underground Storage Tank Remedial Design and Oversight
- i Groundwater Sampling
- i Soil Sampling
- i Field Screening Technologies
- i Enforcement Support

**RELEVANT EXPERIENCE**

Mr. Dustman has over 7 years of experience in project management, building inspection, remedial design activities, environmental site assessments, and field training. He possesses an in-depth knowledge of relevant and applicable federal and state environmental laws, and protocols. Mr. Dustman has been the project manager for a number of local agencies and private clients, including the U.S. Environmental Protection Agency (EPA) Region 4 Superfund Technical Assessment and Response Team (START) contracts; in response to Hurricane Katrina. Mr. Dustman has managed over 100 Phase I Environmental Site Assessments (ESAs) and 30 Phase II ESAs. Upon completion of Phase II activities, Mr. Dustman completed the required oversight for all removal actions. He has prepared sampling and analysis plans; health and safety plans; and reports for emergency responses.

Mr. Dustman has completed over 200 asbestos building inspections and prepared 15 asbestos abatement project design specifications. Mr. Dustman has completed at least 32

**EDUCATION**

B.S., 2003, Environmental Geology,  
Northwest Missouri State University,  
Maryville, Missouri

**WORK HISTORY**

- Family Environmental Compliance Services, Inc., April 2005 to Present
- Terracon, August 2003 to November 2004
- Summit Envirosolutions, May 2003 to June 2003
- Northwest Missouri State University, Research Assistant, 2002-2003

**PROFESSIONAL CERTIFICATIONS**

- EPA Missouri Certified Project Designer
- EPA Missouri Certified Asbestos Inspector
- EPA Missouri Air Sampling Professional
- EPA Missouri Certified Lead-Based Paint Inspector/ Risk Assessor
- EPA Kansas Certified Asbestos Inspector
- EPA Kansas Certified Lead-Based Paint Risk Assessor
- Innov-X Analyzer XRF Certified
- EPA Iowa Certified Asbestos Project Designer
- Iowa Certified Lead Inspector/Risk Assessor
- EPA Nebraska Certified Asbestos Inspector

**TRAINING**

- 40-Hour HAZWOPER
- 8-Hour Refresher
- SCBA Operation and Maintenance
- Emergency Response Procedures
- Field Documentation
- Field Screening Technologies
- Air Monitoring for Hazardous Materials

lead-based paint inspections and performed risk assessments. Mr. Dustman has performed over 100 mold investigations for both residential and commercial facilities.

Mr. Dustman has extensive knowledge and experience with Geoprobe® direct-push technology (DPT), decontamination procedures, and management of investigative derived waste, which he has applied at over 100 private sector projects in Region 7 states to investigate subsurface soil and ground water contamination. Furthermore, Mr. Dustman has conducted training on direct-push technology to clients.

## PROJECT EXPERIENCE

Mr. Dustman designed, managed, and executed the asbestos abatement and building demolition of the former Greyhound Bus Terminal building (Block 100) and the Former Fire Brigade Museum building (Block 82) for the City of Kansas City Missouri, Capital Improvements Management Office (CIMO). Mr. Dustman performed the initial Phase I ESA and performed the Update Phase I ESA for which a Phase II ESA was recommended. Mr. Dustman designed and performed the Phase II ESA which consisted of drilling eight soil borings to bedrock around the perimeter of the property, assessing the on-site soils and groundwater for potential contaminants of concern (COCs), and reporting the findings to the City of Kansas City, Brownfields Coordinator. Mr. Dustman performed an asbestos and lead-based paint inspection which determined that all interior porous building materials would be disposed of as asbestos containing material (ACM) due to a massive asbestos spill located inside the building. All ACM had been intentionally removed and thrown to the floor to salvage copper piping. Mr. Dustman then prepared the remedial design specifications for potential bidders to bid against for the project. The specifications included local regulations, proper work practices, daily reporting, and project oversight. Once the buildings were completely abated they were demolished. Block 82 building materials went to a landfill for disposal. Block 100 was composed of concrete. This building was crumbled to a three inch minus so the structural steel could be removed and recycled. During the building demolition two 10,000 gallon underground storage tanks (USTs) were discovered. Mr. Dustman designed the removal action, collected confirmation soil samples, and submitted the Missouri Risk-Based Corrective Action (MRBCA) Closure Report to the Missouri Department of Natural Resources (MDNR) for review in order to obtain a No Further Action (NFA) letter. The remaining concrete was utilized as engineered fill for the site. A six inch top soil cap was placed on the concrete and seeded for downtown green space. This project was started in October 2008 and completed in March 2010.

Mr. Dustman managed the Downtown Sprint Center Arena on-site mass excavation of soils in Kansas City, Missouri, where 16 Underground Storage Tanks (USTs) were suspected to have been buried. He conducted sampling of soil, surface water, and groundwater, and coordinated a geotechnical survey to locate the buried USTs. In addition, Mr. Dustman oversaw the installation of over 268 piers and screened all soils and water when encountered. Mr. Dustman led a field team that characterized the 4-block arena site for lead-contaminated soil using a Innov-X x-ray fluorescence (XRF) spectrometer and a photo ionization detector (PID) while searching for volatiles in the on-site soils.

*"Mike delivers positive responses to negative situations and remains professional at all times and will make sure his client is protected from potential hazards." - John Popovich, Project Manager, 11500 LLC (former TWA office building)*

Mr. Dustman has managed over 200 on-site asbestos inspections and completed the oversight of multiple story buildings following AHERA protocol. The inspections consisted of identifying homogenous areas and miscellaneous materials for analytical determination. The oversight

consisted of visually inspecting containments, setting daily air samples and setting final air clearance samples.

Mr. Dustman has managed over 100 lead-based paint inspections and completed the oversight of many multi-family residential housing complexes in and around the city of Kansas City, Missouri using HUD protocols. The lead inspections consisted of identifying lead painted components with an XRF analyzer. Mr. Dustman oversaw the implementation of interim controls and developed hazard control plans during risk assessments to better assist clients.

Mr. Dustman has conducted numerous mold investigations of private and commercial properties in and around the city of Kansas City, Missouri. The investigations consisted of visually inspecting commercial buildings or residential houses for mold and running air samples to confirm the presence or absence of mold. Mr. Dustman would then design abatement measures to successfully remove mold from the structure. Final air clearance samples would then be run to determine if abatement measures were complete. A final report would be prepared and delivered to the client in a timely manner.

Mr. Dustman designed a UST removal and led a project team in the removal of a 12,000 gallon heating oil UST, 15,000 gallon JP4-Jet Fuel UST, and a 3,000 gallon heating oil UST at the former TWA World Headquarters building. The USTs were pumped out and their contents disposed of properly. The USTs were then uncovered and removed from their locations exposing soils to be remediated. Soils were tested and remediated to MRBCA standards. Clean fill was brought in to fill the excavations and concreted over. The USTs were cleaned and the metal recycled as scrap.

Mr. Dustman led a project team that assessed more than 10 ammonia anhydrous facilities in northwestern Kansas. The team evaluated historical information to identify the former sites. Once identified, field team members conducted site visits where information was collected to document current site conditions and potential contamination of environmental media. Once assessed, Mr. Dustman instituted interim remedial investigation activities which, included the advancement of 39 probes using a Geoprobe<sup>®</sup> on a grid system to institute direct-push technology, to assess nitrate and ammonia levels in the on-site soils.

Mr. Dustman conducted numerous Phase I ESAs in Missouri, Kansas, Colorado, and Oklahoma including undeveloped land, residential developments, gasoline refueling stations, and automobile repair facilities. Duties included data analysis, report preparation, and interpreting topographic maps and aerial photography.

Mr. Dustman led a team to Junction City Foundry in Junction City, Kansas, he compiled subsurface sampling data utilizing an XRF and screening for lead in soils in conjunction with Geoprobe<sup>®</sup> direct-push technology. The data was used to plan for the removal of lead-contaminated soil from the site.

# *Keith A. Slider*

509 Regina Court  
Raymore, Missouri 64083  
(816) 878-8161

<b>EDUCATION</b>	B.S., Biology, Central Missouri State University, 1993 M.S., Industrial Hygiene, Central Missouri State University, 1996 MBA, Rockhurst University, 2003
<b>AFFILIATIONS/ AWARDS</b>	Air and Waste Management Association Missouri/Kansas Bownfield Consulting Consortium Midwest Environmental Association Missouri Waste Coalition Environmental Assessment Association
<b>REGISTRATIONS</b>	Certified Missouri Air Sampling Professional Certified NIOSH 582 Air Sampling Professional Certified Solid Waste Technician Certified Asbestos Planner and Designer Certified AHERA Asbestos Inspector Certified Lead Based Paint Inspector
<b>QUALIFICATIONS SUMMARY</b>	<p>Mr. Slider has eighteen years of combined professional experience in Environmental Project Management and Environmental Health and Safety including soil, sediment, water and product sampling, air monitoring, environmental evaluation, water resource investigation, hazardous waste project management, remedial design, safety management and safety training. He has performed Preliminary Assessment (Pas), Site Inspection (Sis), Expanded Site Inspections (ESIs) and Emergency Response removal activities in support of SARA mandated goals; provided evaluation of sources and targets for surface water, groundwater, soil and air migration pathways; used EPA PAScore, PREscore, Hazard Ranking System (hrs) Superscreen, and LAST software packages to develop HRS data packages in support of site risk assessment and prioritization; prepared Site-specific Health and Safety Plans, Field Sampling Plans (FSP) and Quality Assurance Project Plans (QAPP); and applied computer modeling to support hazardous waste projects. Mr. Slider is familiar with state and federal regulations including the Clean Air Act; CERCLA, and the Toxic Substances Control Act.</p>

**PROFESSIONAL  
EXPERIENCE**

**Senior Project Manager/Environmental Scientist, Expert Environmental Consulting, Inc., Kansas City, Missouri, 1995- Present**

Mr. Slider is a Senior Project Manager and Environmental Scientist in Expert's Kansas City, Missouri office. He provides technical support on a variety of projects. His primary responsibility is to assist EPA Region VII in evaluating Formerly Used Defense Sites (FUDS) where there is a known or threatened release of a hazardous substance. Activities at these sites include performing Pre-CERCLIS Screenings, PAs, Sis, Expanded Sis (ESIs), and HRS scoring. Mr. Slider is responsible for managing all work assignment activities. Including work plan development, budget maintenance, technical support, scheduling and reporting. Mr. Slider has conducted large and small scale projects, involving the collection of air, soil, sediment, water, and product samples. He also serves as project manager for an ESI at a former army powder storage farm, near St. Louis, Missouri. This project encompassed approximately 2,600 acres and involved the collection of over 2,000 samples.

Mr. Slider also serves as Health and Safety Coordinator. In this position, he tracks pertinent certifications for office-wide field personnel, coordinates training, prepares and reviews Site-Specific Health and Safety Plans, and is responsible for maintaining compliance with OSHA's 29 CFR 1910.1450 regulations.

**Environmental Scientist, Missouri Department of Natural Resources, Kansas City, Missouri, 1999- 2000**

Assigned to the Solid Waste Management Program. Mr. Slider regulated solid waste concerns for twenty-one counties within Missouri; provide technical assistance to sanitary landfills, waste tire haulers and collection centers; provided enforcement support and expert testimony to the Missouri State Attorney General Office; and interacted and coordinated enforcement activities with local, state, and federal government officials.

<p><b>PROFESSIONAL EXPERIENCE (CONTINUED)</b></p>	<p><b>Project Manager/Safety Engineer, BRAL Environmental , Kansas City, Missouri 1995- 1999</b></p> <p>Specialized in Environmental Biology as a Project Manager for the EPA Region VII Superfund Technical Assessment and Response Team (START) Contract. Performed Administrative (ARs), Pas, Sis, and Emergency Response removal activities in support of SARA mandated goals; provided evaluation of sources and targets for surface water, groundwater, soil and air migration pathways; used EPA PA Score, PREscore, and LAST software packages to develop HRS data packages in support of site risk assessment and prioritization; prepared Site-Specific Health and Safety Plans; and applied computer modeling to support hazardous waste projects.</p> <p>As Safety Engineer, he was responsible for maintaining compliance with OSHA’s 29 CFR 1910.1450 regulations. Performed safety compliance audits and inspections; conducted safety orientation and training for 5,000 employees; maintained employee safety records and Material Safety Data Sheets (MSDSs); and developed procedures for improving the working environment based on OSHA regulations.</p>
<p><b>ADDITIONAL TRAINING</b></p>	<p>EPA Model Hazard Ranking Systems Training  EPA PA/ SI Analyst Training  EPA Risk Assessment Training  NIOSH 582 Air Monitoring Training</p>

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

### STANDARD ENVIRONMENTAL RECORDS

#### ***Federal RCRA generators list***

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 02/17/2010 has revealed that there is 1

## EXECUTIVE SUMMARY

RCRA-SQG site within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<b>90 MINUTE DRY CLEANERS</b>	<b>3951 MAIN STREET</b>	<b>SW 1/8 - 1/4 (0.243 mi.)</b>	<b>F22</b>	<b>71</b>

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 02/17/2010 has revealed that there are 2 RCRA-CESQG sites within approximately 0.25 miles of the target property.

### **ADDITIONAL ENVIRONMENTAL RECORDS**

#### ***Other Ascertainable Records***

RCRA-NonGen: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA-NonGen list, as provided by EDR, and dated 02/17/2010 has revealed that there are 6 RCRA-NonGen sites within approximately 0.25 miles of the target property.

General Comments: Site being worked under one claim w/ W&C. ST20591/R6640. 1/10/00 jlg PAH contamination detected in follow-up closure samples that exceeds CALM cleanup levels. Requested plan for further action 11/4/99 JS 01/12/2000 JLG reviewed Phase II - requested additional boring for tanks previously closed in place (high benzene) and approved mw for PAH's with reservations (no previous GW found). 3/24/00 rdh rev'd corr. action report (for R6640) and assessment workplan proposal (for 6613). NOFA issued for R6640. Approval granted for wp for R6613. 10/12/00 kk rev site assessment report (7/19/00). Gw cont in B-2,7, and 8. Soil cont in B-7 and B-8. 1.08 ppb benzopyrene in MW-1. 4/30/01 JLG call from Bob Fine - review of assessment report sent in Feb 01? 5/29/01 TH reviewed off-site sc rpt. Requested workplan as recommended. 7/5/01 JLG call from Bob Fine - is a workplan needed? Yes, keep it simple, indicate planned extent of OE, gw sampling, follow closure report. 8/30/01 TH reviewed workplan. 3/5/02 TH reviewed closure report. 3/18/02 TH gave verbal approval for the installation of the two wells that were destroyed. 6/3/02 TH reviewed GWM report. 11/9/02 kk rev gwmr dated Sept 5, 2002. GW cont below cleanup in all wells. Look forward to next report. 2-28-03; LJB, rww'd 3rd GWM rpt, all MWs below cleanup levels, look forward to next rpt. 6-12-03; LJB, rww'd 4th qtrly GWM rpt, all MW's below cleanup levels, lrt to abandon wells sent. 7-11-03; LJB, rcv'd copies of well abandonment records submitted to GSRAD by FINE, wrote NFA ltr.

Date form received by agency: 06/25/1987  
Facility name: WESTPORT HIGH SCHOOL  
Classification: Small Quantity Generator

Hazardous Waste Summary:

Waste code: D001  
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002  
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D003  
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Classification: Small Quantity Generator

Hazardous Waste Summary:

Waste code: D002  
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D019  
Waste name: CARBON TETRACHLORIDE

Violation Status: No violations found

Special Well Area: 0  
No Excavation: 0  
Comments: 1/9/06 MAS: Completed review of CR and submittals of additional closure materials. The site was originally thought to have solvents from dry cleaning operations stored in the USTs; however, upon analysis of soils and tank contents, no detections of dry cleaning solvents or their breakdown components were detected in the 8260 analysis performed. Consulted Scott Huckstep, B/VCP, regarding the site and in particular if the analyses run (OA1 OA2, 8260 and Metals) was sufficient to identify analytes of concern for dry cleaning facilities. Scott noted that 8260 is the analysis typically run on dry cleaning facilities. Issued NFA.

Previous site investigations were conducted at the site prior to closure, however these reports were not submitted. These reports have been requested to determine if further investigation is necessary at the site. 9-22-1999. D.L. previous site investigation showed contamination in areas around the pit that were overexcavated during closure and cleanup levels achieved. issued NoFA on site</p>

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

The MO-DNR (Missouri Department of Natural Resources) program involves a Resource Assessment and Monitoring Program, biological criteria development, monitoring of targeted sites to determine compliance with the designated use of aquatic life protection in the standards,

monitoring for 303(3) purposes, and the development of a stream classification framework.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

samples, and conduct quarterly monitoring for one year 8/1/02 MA rev SCR soil results indicate below cleanup levels, gw samples indicate contamination above cleanup levels in MW-2, and -7, req CAP to address soil and gw contamination in MW-2 and gwm program. 10/23/02 MA rev gwmr contaminated gw is present in MW2, and -7 only, will continue quarterly monitoring. 5/7/03 MA rev gwmr cont gw is present in MW(2, 7) will continue monitoring as approved. 7/25/03 MA rev gwmr, benzene is the only contaminant of concern found in MW(2, 7), plume is stable and continuing to decline, issued deferral on gwm until the new gw rule is issued. 7/16/04 MA rev Tier I RBCA report. Soil and gw contamination are limited to the property. The report is incomplete for several reasons. Requested collection of field data necessary to complete risk assessment and other information. 12/6/04 MA rev a Tier 1 RBCA report. The plume is confined to the site. No off-site impact. The area around the building footprint is not impacted. The max concentrations in soil do not exceed the Tier 1 RBTLs for on-site construction worker. Issued a NOFA letter. 12/23/04: NFR issued.

EXCAVATED/DISPOSED OF AFFECTED SOIL. THE LUST UNIT WILL OVERSEE CLOSURE. Additional Information: 08/18/94 - BRIAN ALLEN - CONSULTANT FOR RP HAS BEEN IN CONTACT WITH KCRO-LUST UNIT PERSONNEL. SITE HAD 2 UNDERGROUND STORAGE TANKS, LAST USED PRIOR TO 1960. ONE 3,000-GALLON AND 1 2,500-GALLON (WHICH HAD HOLES IN IT). TANKS HAVE BEEN REMOVED. RP WILL FOLLOW UP WITH LUST UNIT FOR CLOSURE ON THIS SITE. APPARENTLY NO GROUNDWATER ENCOUNTERED & CONSULTANT REPORTED GETTING INTO "CLEAN CLAY" AT ABOUT 10 FEET DEPTH (TANKS WERE REPORTED TO BE 8 FEET DEEP).

General Comments: 04/04/2005 - Requested WP for site investigation based on contamination found during phase II. - LL 2/24/09 - LTA reviewed file. Based on a review of the file and public information obtained from the Internet, the following is inferred: 1) Current and future use of the site is non-residential. The site is currently a banking facility. 2) Based on the location of the site, the groundwater use pathway is likely incomplete. 3) The impacts to soil have been delineated horizontally and vertically. 4) Groundwater is not impacted above the DTLs. Impacts to soil were not identified above the Tier 1 (sandy soil), non-residential, subsurface soil, indoor inhalation of vapor emissions risk-based target levels. Based on the information obtained from the file, the inferences above, and the lack of a responsible party, R0007902 is recommended for administrative closure. At a future date, should the current owner of the site (Downtown Investments L.L.C., 3629 N. Hydraulic Street, Wichita, Kansas 67219) request a No Further Action letter, permanent monitoring wells for confirmation of the source area and groundwater quality might be required.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## STANDARD ENVIRONMENTAL RECORDS

### ***Federal NPL site list***

#### **NPL: National Priority List**

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 03/31/2010	Source: EPA
Date Data Arrived at EDR: 04/02/2010	Telephone: N/A
Date Made Active in Reports: 04/12/2010	Last EDR Contact: 07/14/2010
Number of Days to Update: 10	Next Scheduled EDR Contact: 10/25/2010
	Data Release Frequency: Quarterly

#### **Proposed NPL: Proposed National Priority List Sites**

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 03/31/2010	Source: EPA
Date Data Arrived at EDR: 04/02/2010	Telephone: N/A
Date Made Active in Reports: 04/12/2010	Last EDR Contact: 07/14/2010
Number of Days to Update: 10	Next Scheduled EDR Contact: 10/25/2010
	Data Release Frequency: Quarterly

#### **NPL LIENS: Federal Superfund Liens**

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267

Number of Days to Update: 56	Next Scheduled EDR Contact: 11/29/2010
	Data Release Frequency: No Update Planned

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## ***Federal Delisted NPL site list***

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 03/31/2010	Source: EPA
Date Data Arrived at EDR: 04/02/2010	Telephone: N/A
Date Made Active in Reports: 04/12/2010	Last EDR Contact: 07/14/2010
Number of Days to Update: 10	Next Scheduled EDR Contact: 10/25/2010
	Data Release Frequency: Quarterly

## ***Federal CERCLIS list***

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 01/29/2010	Source: EPA
Date Data Arrived at EDR: 02/09/2010	Telephone: 703-412-9810
Date Made Active in Reports: 04/12/2010	Last EDR Contact: 09/02/2010
Number of Days to Update: 62	Next Scheduled EDR Contact: 10/11/2010
	Data Release Frequency: Quarterly

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA's Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 06/23/2009	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/15/2010	Telephone: 703-603-8704
Date Made Active in Reports: 02/10/2010	Last EDR Contact: 07/21/2010
Number of Days to Update: 26	Next Scheduled EDR Contact: 10/25/2010
	Data Release Frequency: Varies

## ***Federal CERCLIS NFRAP site List***

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 06/23/2009	Source: EPA
Date Data Arrived at EDR: 09/02/2009	Telephone: 703-412-9810
Date Made Active in Reports: 09/21/2009	Last EDR Contact: 09/02/2010
Number of Days to Update: 19	Next Scheduled EDR Contact: 12/13/2010
	Data Release Frequency: Quarterly

## ***Federal RCRA CORRACTS facilities list***

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Data Release Frequency: Quarterly

## ***Federal RCRA non-CORRACTS TSD facilities list***

### **RCRA-TSDF: RCRA - Treatment, Storage and Disposal**

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 02/17/2010  
Date Data Arrived at EDR: 02/19/2010  
Date Made Active in Reports: 05/17/2010  
Number of Days to Update: 87

Source: Environmental Protection Agency

## ***Federal RCRA generators list***

### **RCRA-LQG: RCRA - Large Quantity Generators**

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 02/17/2010  
Date Data Arrived at EDR: 02/19/2010  
Date Made Active in Reports: 05/17/2010  
Number of Days to Update: 87

Telephone: 913-551-7003  
Last EDR Contact: 08/19/2010  
Next Scheduled EDR Contact: 10/18/2010  
Data Release Frequency: Quarterly

### **RCRA-SQG: RCRA - Small Quantity Generators**

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 02/17/2010  
Date Data Arrived at EDR: 02/19/2010  
Date Made Active in Reports: 05/17/2010  
Number of Days to Update: 87

Telephone: 913-551-7003  
Last EDR Contact: 08/19/2010  
Next Scheduled EDR Contact: 10/18/2010  
Data Release Frequency: Quarterly

### **RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators**

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 02/17/2010  
Date Data Arrived at EDR: 02/19/2010  
Date Made Active in Reports: 05/17/2010

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## ***Federal institutional controls / engineering controls registries***

### US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 12/20/2009	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/20/2010	Telephone: 703-603-0695
Date Made Active in Reports: 04/12/2010	Last EDR Contact: 09/13/2010
Number of Days to Update: 82	Next Scheduled EDR Contact: 12/27/2010
	Data Release Frequency: Varies

### US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 12/20/2009	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/20/2010	Telephone: 703-603-0695
Date Made Active in Reports: 04/12/2010	Last EDR Contact: 09/13/2010
Number of Days to Update: 82	Next Scheduled EDR Contact: 12/27/2010
	Data Release Frequency: Varies

## ***Federal ERNS list***

### ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 07/09/2010	Source: National Response Center, United States Coast Guard
Date Data Arrived at EDR: 07/09/2010	Telephone: 202-267-2180
Date Made Active in Reports: 08/17/2010	Last EDR Contact: 07/09/2010
Number of Days to Update: 39	Next Scheduled EDR Contact: 10/18/2010
	Data Release Frequency: Annually

## ***State- and tribal - equivalent CERCLIS***

### SHWS: Registry of Confirmed Abandoned or Uncontrolled Hazardous Waste Disposal Sites

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

Date of Government Version: 07/08/2010	Source: Department of Natural Resources
Date Data Arrived at EDR: 07/12/2010	Telephone: 573-751-1990
Date Made Active in Reports: 08/17/2010	Last EDR Contact: 09/07/2010
Number of Days to Update: 36	Next Scheduled EDR Contact: 12/20/2010
	Data Release Frequency: Quarterly

### HWS DETAIL: Registry Annual Report

Each site is described in detail in this annual report and includes the following information: a general description of the site; a summary of any significant environmental problems at and near the site; a summary of any serious health problems in the immediate vicinity of the site; the status of any testing, monitoring or remedial actions in progress or recommended by the department.

Date of Government Version: 06/30/2009	Source: Department of Natural Resources
Date Data Arrived at EDR: 03/24/2010	Telephone: 573-751-3176
Date Made Active in Reports: 04/26/2010	Last EDR Contact: 09/15/2010
Number of Days to Update: 33	Next Scheduled EDR Contact: 12/02/5007
	Data Release Frequency: Annually

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## ***State and tribal landfill and/or solid waste disposal site lists***

### SWF/LF: Solid Waste Facility List

Solid Waste Facilities/Landfill Sites. SWF/LF type records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 08/03/2010	Source: Department of Natural Resources
Date Data Arrived at EDR: 08/03/2010	Telephone: 573-751-5401
Date Made Active in Reports: 08/12/2010	Last EDR Contact: 09/07/2010
Number of Days to Update: 9	Next Scheduled EDR Contact: 12/20/2010
	Data Release Frequency: Quarterly

## ***State and tribal leaking storage tank lists***

### LUST: Leaking Underground Storage Tanks

Leaking Underground Storage Tank Incident Reports. LUST records contain an inventory of reported leaking underground storage tank incidents. Not all states maintain these records, and the information stored varies by state.

Date of Government Version: 06/17/2010	Source: Department of Natural Resources
Date Data Arrived at EDR: 06/18/2010	Telephone: 573-751-0135
Date Made Active in Reports: 06/29/2010	Last EDR Contact: 06/18/2010
Number of Days to Update: 11	Next Scheduled EDR Contact: 10/04/2010
	Data Release Frequency: Semi-Annually

### LAST: Leaking Aboveground Storage Tanks

A listing of leaking aboveground storage tanks.

Date of Government Version: 06/17/2010	Source: Department of Natural Resources
Date Data Arrived at EDR: 06/18/2010	Telephone: 573-751-6822
Date Made Active in Reports: 06/29/2010	Last EDR Contact: 06/18/2010
Number of Days to Update: 11	Next Scheduled EDR Contact: 10/04/2010
	Data Release Frequency: Quarterly

### INDIAN LUST R9: Leaking Underground Storage Tanks on Indian Land

LUSTs on Indian land in Arizona, California, New Mexico and Nevada

Date of Government Version: 05/27/2010	Source: Environmental Protection Agency
Date Data Arrived at EDR: 05/28/2010	Telephone: 415-972-3372
Date Made Active in Reports: 08/09/2010	Last EDR Contact: 08/02/2010
Number of Days to Update: 73	Next Scheduled EDR Contact: 11/15/2010
	Data Release Frequency: Quarterly

### INDIAN LUST R4: Leaking Underground Storage Tanks on Indian Land

LUSTs on Indian land in Florida, Mississippi and North Carolina.

Date of Government Version: 05/19/2010	Source: EPA Region 4
Date Data Arrived at EDR: 05/21/2010	Telephone: 404-562-8677
Date Made Active in Reports: 08/09/2010	Last EDR Contact: 08/02/2010
Number of Days to Update: 80	Next Scheduled EDR Contact: 11/15/2010
	Data Release Frequency: Semi-Annually

### INDIAN LUST R10: Leaking Underground Storage Tanks on Indian Land

LUSTs on Indian land in Alaska, Idaho, Oregon and Washington.

Date of Government Version: 05/04/2010	Source: EPA Region 10
Date Data Arrived at EDR: 05/05/2010	Telephone: 206-553-2857
Date Made Active in Reports: 05/27/2010	Last EDR Contact: 08/02/2010
Number of Days to Update: 22	Next Scheduled EDR Contact: 11/15/2010
	Data Release Frequency: Quarterly

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## INDIAN LUST R1: Leaking Underground Storage Tanks on Indian Land

A listing of leaking underground storage tank locations on Indian Land.

Date of Government Version: 02/19/2009	Source: EPA Region 1
Date Data Arrived at EDR: 02/19/2009	Telephone: 617-918-1313
Date Made Active in Reports: 03/16/2009	Last EDR Contact: 08/02/2010
Number of Days to Update: 25	Next Scheduled EDR Contact: 11/15/2010
	Data Release Frequency: Varies

## INDIAN LUST R6: Leaking Underground Storage Tanks on Indian Land

LUSTs on Indian land in New Mexico and Oklahoma.

Date of Government Version: 05/03/2010	Source: EPA Region 6
Date Data Arrived at EDR: 05/05/2010	Telephone: 214-665-6597
Date Made Active in Reports: 05/27/2010	Last EDR Contact: 08/02/2010
Number of Days to Update: 22	Next Scheduled EDR Contact: 11/15/2010
	Data Release Frequency: Varies

## INDIAN LUST R7: Leaking Underground Storage Tanks on Indian Land

LUSTs on Indian land in Iowa, Kansas, and Nebraska

Date of Government Version: 11/04/2009	Source: EPA Region 7
Date Data Arrived at EDR: 05/04/2010	Telephone: 913-551-7003
Date Made Active in Reports: 07/07/2010	Last EDR Contact: 08/11/2010
Number of Days to Update: 64	Next Scheduled EDR Contact: 11/15/2010
	Data Release Frequency: Varies

## INDIAN LUST R8: Leaking Underground Storage Tanks on Indian Land

LUSTs on Indian land in Colorado, Montana, North Dakota, South Dakota, Utah and Wyoming.

Date of Government Version: 05/24/2010	Source: EPA Region 8
Date Data Arrived at EDR: 05/27/2010	Telephone: 303-312-6271
Date Made Active in Reports: 08/09/2010	Last EDR Contact: 08/02/2010
Number of Days to Update: 74	Next Scheduled EDR Contact: 11/15/2010
	Data Release Frequency: Quarterly

### **State and tribal registered storage tank lists**

#### UST: Petroleum Storage Tanks

Registered Underground Storage Tanks. UST's are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA) and must be registered with the state department responsible for administering the UST program. Available information varies by state program.

Date of Government Version: 06/17/2010	Source: Department of Natural Resources
Date Data Arrived at EDR: 06/18/2010	Telephone: 573-751-0135
Date Made Active in Reports: 06/23/2010	Last EDR Contact: 06/18/2010
Number of Days to Update: 5	Next Scheduled EDR Contact: 10/04/2010
	Data Release Frequency: Semi-Annually

#### AST: Aboveground Petroleum Storage Tanks Registered Aboveground Storage Tanks.

Date of Government Version: 12/31/2009	Source: Department of Agriculture
Date Data Arrived at EDR: 12/31/2009	Telephone: 573-751-7062
Date Made Active in Reports: 01/28/2010	Last EDR Contact: 07/16/2010
Number of Days to Update: 28	Next Scheduled EDR Contact: 10/04/2010
	Data Release Frequency: Semi-Annually

#### INDIAN UST R8: Underground Storage Tanks on Indian Land

The Indian Underground Storage Tank (UST) database provides information about underground storage tanks on Indian land in EPA Region 8 (Colorado, Montana, North Dakota, South Dakota, Utah, Wyoming and 27 Tribal Nations).

## ***State and tribal Brownfields sites***

### **BROWNFIELDS: Brownfields Site List**

Brownfields are sites where redevelopment and reuse is hampered by known or suspected contamination with hazardous substances. While many brownfield sites are minimally contaminated, potential environmental liability can be a problem for owners, operators, prospective buyers and financial institutions. Because of the large number of these sites, their economic impact especially in heavily industrial areas is substantial.

Date of Government Version: 05/17/2010  
Date Data Arrived at EDR: 06/23/2010

Data Release Frequency: Semi-Annually

## **ADDITIONAL ENVIRONMENTAL RECORDS**

### ***Local Brownfield lists***

#### **US BROWNFIELDS: A Listing of Brownfields Sites**

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients--States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

## **Local Lists of Hazardous waste / Contaminated Sites**

### US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

## **Other Ascertainable Records**

### **RCRA-NonGen: RCRA - Non Generators**

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Date of Government Version: 02/17/2010

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## ROD: Records Of Decision

Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

Date of Government Version: 06/01/2010	Source: EPA
Date Data Arrived at EDR: 06/16/2010	Telephone: 703-416-0223
Date Made Active in Reports: 08/17/2010	Last EDR Contact: 09/15/2010
Number of Days to Update: 62	Next Scheduled EDR Contact: 12/27/2010
	Data Release Frequency: Annually

## UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

Date of Government Version: 01/05/2009	Source: Department of Energy

**HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing**

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501
Date Made Active in Reports: 04/10/2007	Last EDR Contact: 12/17/2007
Number of Days to Update: 40	Next Scheduled EDR Contact: 03/17/2008
	Data Release Frequency: No Update Planned

**HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing**

A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

**SSTS: Section 7 Tracking Systems**

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

Date of Government Version: 12/31/2008	Source: EPA
Date Data Arrived at EDR: 01/06/2010	Telephone: 202-564-4203

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## PADS: PCB Activity Database System

PCB Activity Database. PADS Identifies generators, transporters, commercial storers and/or brokers and disposers of PCB's who are required to notify the EPA of such activities.

Date of Government Version: 02/01/2010	Source: EPA
Date Data Arrived at EDR: 04/22/2010	Telephone: 202-566-0500
Date Made Active in Reports: 08/09/2010	Last EDR Contact: 07/30/2010
Number of Days to Update: 109	Next Scheduled EDR Contact: 11/01/2010
	Data Release Frequency: Annually

## MLTS: Material Licensing Tracking System

MLTS is maintained by the Nuclear Regulatory Commission and contains a list of approximately 8,100 sites which possess or use radioactive materials and which are subject to NRC licensing requirements. To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 03/18/2010	Source: Nuclear Regulatory Commission
Date Data Arrived at EDR: 04/06/2010	Telephone: 301-415-7169
Date Made Active in Reports: 05/27/2010	Last EDR Contact: 09/13/2010
Number of Days to Update: 51	Next Scheduled EDR Contact: 12/27/2010
	Data Release Frequency: Quarterly

## RADINFO: Radiation Information Database

The Radiation Information Database (RADINFO) contains information about facilities that are regulated by U.S. Environmental Protection Agency (EPA) regulations for radiation and radioactivity.

Date of Government Version: 07/13/2010	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/14/2010	Telephone: 202-343-9775
Date Made Active in Reports: 08/09/2010	Last EDR Contact: 07/14/2010
Number of Days to Update: 26	Next Scheduled EDR Contact: 10/25/2010
	Data Release Frequency: Quarterly

## FINDS: Facility Index System/Facility Registry System

Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

Date of Government Version: 04/14/2010	Source: EPA
Date Data Arrived at EDR: 04/16/2010	Telephone: (913) 551-7003
Date Made Active in Reports: 05/27/2010	Last EDR Contact: 09/15/2010
Number of Days to Update: 41	Next Scheduled EDR Contact: 12/27/2010
	Data Release Frequency: Quarterly

## RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995	Source: EPA
Date Data Arrived at EDR: 07/03/1995	Telephone: 202-564-4104
Date Made Active in Reports: 08/07/1995	Last EDR Contact: 06/02/2008
Number of Days to Update: 35	Next Scheduled EDR Contact: 09/01/2008
	Data Release Frequency: No Update Planned

## BRS: Biennial Reporting System

The Biennial Reporting System is a national system administered by the EPA that collects data on the generation and management of hazardous waste. BRS captures detailed data from two groups: Large Quantity Generators (LQG) and Treatment, Storage, and Disposal Facilities.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## EDR PROPRIETARY RECORDS

### *EDR Proprietary Records*

#### Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Date of Government Version: N/A

## OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

#### CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 12/31/2007

Date Data Arrived at EDR: 08/26/2009

## GEOCHECK<sup>®</sup> - PHYSICAL SETTING SOURCE ADDENDUM

### TARGET PROPERTY ADDRESS

WESTPORT MIDDLE  
300 E. 39TH STREET  
KANSAS CITY, MO 64111

### TARGET PROPERTY COORDINATES

Latitude (North):	39.05720 - 39° 3' 25.9"
Longitude (West):	94.5827 - 94° 34' 57.7"
Universal Tranverse Mercator:	Zone 15
UTM X (Meters):	363054.5
UTM Y (Meters):	4324108.0
Elevation:	911 ft. above sea level

### USGS TOPOGRAPHIC MAP

Target Property Map:	39094-A5 KANSAS CITY, MO
Most Recent Revision:	1996

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

## TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General East

## SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

## FEMA FLOOD ZONE

<u>Target Property County</u> JACKSON, MO	<u>FEMA Flood Electronic Data</u> YES - refer to the Overview Map and Detail Map
Flood Plain Panel at Target Property:	29095C - FEMA DFIRM Flood data
Additional Panels in search area:	Not Reported

## NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u> KANSAS CITY	<u>NWI Electronic Data Coverage</u> YES - refer to the Overview Map and Detail Map
---	---

## HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

### Soil Map ID: 1

Soil Component Name: Urban land

Soil Surface Texture: Not reported  
Hydrologic Group: Not reported

Soil Drainage Class: Not reported  
Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	5 inches		Not reported	Not reported	Max: Min:	Max: Min:

### Soil Map ID: 2

Soil Component Name: Sibley

Soil Surface Texture: silt loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	25 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 14 Min: 4	Max: 7.3 Min: 5.6
2	25 inches	64 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 14 Min: 4	Max: 7.3 Min: 5.6
3	64 inches	70 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 14 Min: 4	Max: 7.3 Min: 5.6

### Soil Map ID: 3

Soil Component Name: Kennebec

Soil Surface Texture: silt loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Moderately well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 122 inches

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	18 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 14 Min: 4	Max: 7.3 Min: 6.1
2	18 inches	59 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 14 Min: 4	Max: 7.3 Min: 6.1

**Soil Map ID: 4**

Soil Component Name:                      Urban land

Soil Surface Texture:

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

## WELL SEARCH DISTANCE INFORMATION

<u>DATABASE</u>	<u>SEARCH DISTANCE (miles)</u>
Federal USGS	1.000
Federal FRDS PWS	Nearest PWS within 1 mile
State Database	1.000

## FEDERAL USGS WELL INFORMATION

<u>MAP ID</u>	<u>WELL ID</u>	<u>LOCATION FROM TP</u>
2	USGS2627105	1/2 - 1 Mile South

## FEDERAL FRDS PUBLIC WATER SUPPLY SYSTEM INFORMATION

<u>MAP ID</u>	<u>WELL ID</u>	<u>LOCATION FROM TP</u>
No PWS System Found		

Note: PWS System location is not always the same as well location.

## STATE DATABASE WELL INFORMATION

<u>MAP ID</u>	<u>WELL ID</u>	<u>LOCATION FROM TP</u>
1	MOLOG1000021876	1/2 - 1 Mile NW
3	MOLOG1000021917	1/2 - 1 Mile NNW

## OTHER STATE DATABASE INFORMATION

### STATE OIL/GAS WELL INFORMATION

<u>MAP ID</u>	<u>WELL ID</u>	<u>LOCATION FROM TP</u>

## TOPOGRAPHIC INFORMATION

### USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

### Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

## HYDROLOGIC INFORMATION

**Flood Zone Data:** This data, available in select counties across the country, was obtained by EDR in 2003 & 2009 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

**NWI:** National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

## HYDROGEOLOGIC INFORMATION

### AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

### Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

### STATE RECORDS

#### Missouri Public Drinking Water Wells

Source: Department of Natural Resources

Telephone: 573-526-5448

## OTHER STATE DATABASE INFORMATION

#### Oil and Gas Well Database

Source: Department of Natural Resources

Telephone: 573-368-2195

### RADON

#### Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

#### EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

### OTHER

#### Airport Landing Facilities: Private and public use landing facilities

Source: Federal Aviation Administration, 800-457-6656

#### Epicenters: World earthquake epicenters, Richter 5 or greater

## The EDR Aerial Photo Decade Package

# EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

**When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.**

***Thank you for your business.***

Please contact EDR at 1-800-352-0050  
with any questions or comments.

## 2009 Enhancements to EDR City Directory Abstract

New for 2009, the EDR City Directory Abstract has been enhanced with additional information and features. These enhancements will make your city directory research process more efficient, flexible, and insightful than ever before. The enhancements will improve the options for selecting adjoining properties, and will speed up your review of the report.

**City Directory Report.** Three important enhancements have been made to the EDR City Directory Abstract:

1. *Executive Summary.* The report begins with an Executive Summary that lists the sources consulted in the preparation of the report. Where available, a parcel map is also provided within the report, showing the locations of properties researched.
2. *Page Images.* Where available, the actual page source images will be included in the Appendix, so that you can review them for information that may provide additional insight. EDR has copyright permission to include these images.
3. *Findings Listed by Location.* Another useful enhancement is that findings are now grouped by address. This will significantly reduce the time you need to review your abstracts. Findings are provided under each property address, listed in reverse chronological order and referencing the source for each entry.

**Options for Selecting Adjoining Properties.** Ensuring that the right adjoining property addresses are searched is one of the biggest challenges that environmental professionals face when conducting city directory historical research. EDR's new enhancements make it easier for you to meet this challenge. Now, when you place an order for the EDR City Directory Abstract, you have the following choices for determining which addresses should be researched.

1. *You Select Addresses and EDR Selects Addresses.* Use the "Add Another Address" feature to specify the addresses you want researched. Your selections will be supplemented by addresses selected by EDR researchers using our established research methods. Where available, a digital map will be shown, indicating property lines overlaid on a color aerial photo and their corresponding addresses. Simply use the address list below the map to check off which properties shown on the map you want to include. You may also select other addresses using the "Add Another Address" feature at the bottom of the list.
2. *EDR Selects Addresses.* Choose this method if you want EDR's researchers to select the addresses to be researched for you, using our established research methods.
3. *You Select Addresses.* Use this method for research based solely on the addresses you select or enter into the system.
4. *Hold City Directory Research Option.* If you choose to select your own adjoining addresses, you may pause production of your EDR City Directory Abstract report until you have had a chance to look at your other EDR reports and sources. Sources for property addresses include: your Certified Sanborn Map Report may show you the location of property addresses; the new EDR Property Tax Map Report may show the location of property addresses; and your field research can supplement these sources with additional address information. To use this capability, simply click "Hold City Directory research" box under "Other Options" at the bottom of the page. Once you have determined what addresses you want researched, go to your EDR Order Status page, select the EDR City Directory Abstract, and enter the addresses and submit for production.

Questions? Contact your EDR representative at 800-352-0050. For more information about all of EDR's 2009 report and service enhancements, visit [www.edrnet.com/2009enhancements](http://www.edrnet.com/2009enhancements)

## EXECUTIVE SUMMARY

### DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1909 through 2006. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

### RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

## FINDINGS

### TARGET PROPERTY: ADDRESS NOT IDENTIFIED IN RESEARCH SOURCE

The following Target Property addresses were researched for this report, and the addresses were not identified in the research source.

#### Address Researched

300 E. 39th Street

#### Address Not Identified in Research Source

1990, 1985, 1980, 1975, 1970, 1966, 1961, 1956, 1951, 1945, 1940, 1935, 1930, 1925, 1920, 1909

### ADJOINING PROPERTY: ADDRESSES NOT IDENTIFIED IN RESEARCH SOURCE

The following Adjoining Property addresses were researched for this report, and the addresses were not identified in research source.

#### Address Researched

111 39TH E

#### Address Not Identified in Research Source

2006, 2000, 1995, 1990, 1985, 1980, 1975, 1970, 1966, 1961, 1956, 1925, 1909

## EDR Historical Topographic Map Report

# EDR Historical Topographic Map Report

Environmental Data Resources, Inc.s (EDR) Historical Topographic Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topographic Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the early 1900s.

***Thank you for your business.***  
Please contact EDR at 1-800-352-0050  
with any questions or comments.

## **Disclaimer - Copyright and Trademark Notice**

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OF DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT.** Purchaser accepts this Report AS IS. Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

## EDR Environmental LienSearch™ Report

The EDR Environmental LienSearch Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

***Thank you for your business.***  
Please contact EDR at 1-800-352-0050  
with any questions or comments.

**REMINDER:** Occasionally, the parcel number for a real estate parcel changes, due to a split, merger or re-blocking. In such a case, the new parcel number may not reflect tax delinquency or other tax history concerning the prior parcel number, and you will need to contact us to obtain that information.

**ATTENTION:** This website will close at 7:00 p.m. on December 31.

# The EDR Property Tax Map Report

## EDR Property Tax Map Report

Environmental Data Resources, Inc.'s EDR Property Tax Map Report is designed to assist environmental professionals in evaluating potential environmental conditions on a target property by understanding property boundaries and other characteristics. The report includes a search of available property tax maps, which include information on boundaries for the target property and neighboring properties, addresses, parcel identification numbers, as well as other data typically used in property location and identification.

***Thank you for your business.***

# Custom Soil Resource Report for Jackson County, Missouri

## Westport Middle

# Preface

---

Soil surveys contain information that affects land use planning in survey areas. They highlight soil limitations that affect various land uses and provide information about the properties of the soils in the survey areas. Soil surveys are designed for many different users, including farmers, ranchers, foresters, agronomists, urban planners, community officials, engineers, developers, builders, and home buyers. Also, conservationists, teachers, students, and specialists in recreation, waste disposal, and pollution control can use the surveys to help them understand, protect, or enhance the environment.

Various land use regulations of Federal, State, and local governments may impose special restrictions on land use or land treatment. Soil surveys identify soil properties that are used in making various land use or land treatment decisions. The information is intended to help the land users identify and reduce the effects of soil limitations on various land uses. The landowner or user is responsible for identifying and complying with existing laws and regulations.

Although soil survey information can be used for general farm, local, and wider area planning, onsite investigation is needed to supplement this information in some cases. Examples include soil quality assessments (<http://soils.usda.gov/sqi/>) and certain conservation and engineering applications. For more detailed information, contact your local USDA Service Center (<http://offices.sc.egov.usda.gov/locator/app?agency=nrsc>) or your NRCS State Soil Scientist ([http://soils.usda.gov/contact/state\\_offices/](http://soils.usda.gov/contact/state_offices/)).

Great differences in soil properties can occur within short distances. Some soils are seasonally wet or subject to flooding. Some are too unstable to be used as a foundation for buildings or roads. Clayey or wet soils are poorly suited to use as septic tank absorption fields. A high water table makes a soil poorly suited to basements or underground installations.

The National Cooperative Soil Survey is a joint effort of the United States Department of Agriculture and other Federal agencies, State agencies including the Agricultural Experiment Stations, and local agencies. The Natural Resources Conservation Service (NRCS) has leadership for the Federal part of the National Cooperative Soil Survey.

Information about soils is updated periodically. Updated information is available through the NRCS Soil Data Mart Web site or the NRCS Web Soil Survey. The Soil Data Mart is the data storage site for the official soil survey information.

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, age, disability, and where applicable, sex, marital status, familial status, parental status, religion, sexual orientation, genetic information, political beliefs, reprisal, or because all or a part of an individual's income is derived from any public assistance program. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means

for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD). To file a complaint of discrimination, write to USDA, Director, Office of Civil Rights, 1400 Independence Avenue, S.W., Washington, D.C. 20250-9410 or call (800) 795-3272 (voice) or (202) 720-6382 (TDD). USDA is an equal opportunity provider and employer.

# **How Soil Surveys Are Made**

---

Soil surveys are made to provide information about the soils and miscellaneous areas in a specific area. They include a description of the soils and miscellaneous areas and their location on the landscape and tables that show soil properties and limitations affecting various uses. Soil scientists observed the steepness, length, and shape of the slopes; the general pattern of drainage; the kinds of crops and native plants; and the kinds of bedrock. They observed and described many soil profiles. A soil profile is the sequence of natural layers, or horizons, in a soil. The profile extends from the surface down into the unconsolidated material in which the soil formed or from the surface down to bedrock. The unconsolidated material is devoid of roots and other living organisms and has not been changed by other biological activity.

Currently, soils are mapped according to the boundaries of major land resource areas (MLRAs). MLRAs are geographically associated land resource units that share common characteristics related to physiography, geology, climate, water resources, soils, biological resources, and land uses (USDA, 2006). Soil survey areas typically consist of parts of one or more MLRA.

The soils and miscellaneous areas in a survey area occur in an orderly pattern that is related to the geology, landforms, relief, climate, and natural vegetation of the area. Each kind of soil and miscellaneous area is associated with a particular kind of landform or with a segment of the landform. By observing the soils and miscellaneous areas in the survey area and relating their position to specific segments of the landform, a soil scientist develops a concept, or model, of how they were formed. Thus, during mapping, this model enables the soil scientist to predict with a considerable degree of accuracy the kind of soil or miscellaneous area at a specific location on the landscape.

Commonly, individual soils on the landscape merge into one another as their characteristics gradually change. To construct an accurate soil map, however, soil scientists must determine the boundaries between the soils. They can observe only a limited number of soil profiles. Nevertheless, these observations, supplemented by an understanding of the soil-vegetation-landscape relationship, are sufficient to verify predictions of the kinds of soil in an area and to determine the boundaries.

Soil scientists recorded the characteristics of the soil profiles that they studied. They noted soil color, texture, size and shape of soil aggregates, kind and amount of rock fragments, distribution of plant roots, reaction, and other features that enable them to identify soils. After describing the soils in the survey area and determining their properties, the soil scientists assigned the soils to taxonomic classes (units). Taxonomic classes are concepts. Each taxonomic class has a set of soil characteristics with precisely defined limits. The classes are used as a basis for comparison to classify soils systematically. Soil taxonomy, the system of taxonomic classification used in the United States, is based mainly on the kind and character of soil properties and the arrangement of horizons within the profile. After the soil scientists classified and named the soils in the survey area, they compared the

## Custom Soil Resource Report

individual soils with similar soils in the same taxonomic class in other areas so that they could confirm data and assemble additional data based on experience and research.

The objective of soil mapping is not to delineate pure map unit components; the objective is to separate the landscape into landforms or landform segments that have similar use and management requirements. Each map unit is defined by a unique combination of soil components and/or miscellaneous areas in predictable proportions. Some components may be highly contrasting to the other components of the map unit. The presence of minor components in a map unit in no way diminishes the usefulness or accuracy of the data. The delineation of such landforms and landform segments on the map provides sufficient information for the development of resource plans. If intensive use of small areas is planned, onsite investigation is needed to define and locate the soils and miscellaneous areas.

Soil scientists make many field observations in the process of producing a soil map. The frequency of observation is dependent upon several factors, including scale of mapping, intensity of mapping, design of map units, complexity of the landscape, and experience of the soil scientist. Observations are made to test and refine the soil-landscape model and predictions and to verify the classification of the soils at specific locations. Once the soil-landscape model is refined, a significantly smaller number of measurements of individual soil properties are made and recorded. These measurements may include field measurements, such as those for color, depth to bedrock, and texture, and laboratory measurements, such as those for content of sand, silt, clay, salt, and other components. Properties of each soil typically vary from one point to another across the landscape.

Observations for map unit components are aggregated to develop ranges of characteristics for the components. The aggregated values are presented. Direct measurements do not exist for every property presented for every map unit component. Values for some properties are estimated from combinations of other properties.

While a soil survey is in progress, samples of some of the soils in the area generally are collected for laboratory analyses and for engineering tests. Soil scientists interpret the data from these analyses and tests as well as the field-observed characteristics and the soil properties to determine the expected behavior of the soils under different uses. Interpretations for all of the soils are field tested through observation of the soils in different uses and under different levels of management. Some interpretations are modified to fit local conditions, and some new interpretations are developed to meet local needs. Data are assembled from other sources, such as research information, production records, and field experience of specialists. For example, data on crop yields under defined levels of management are assembled from farm records and from field or plot experiments on the same kinds of soil.

Predictions about soil behavior are based not only on soil properties but also on such variables as climate and biological activity. Soil conditions are predictable over long periods of time, but they are not predictable from year to year. For example, soil scientists can predict with a fairly high degree of accuracy that a given soil will have a high water table within certain depths in most years, but they cannot predict that a high water table will always be at a specific level in the soil on a specific date.

After soil scientists located and identified the significant natural bodies of soil in the survey area, they drew the boundaries of these bodies on aerial photographs and identified each as a specific map unit. Aerial photographs show trees, buildings, fields, roads, and rivers, all of which help in locating boundaries accurately.

# Soil Map

---

The soil map section includes the soil map for the defined area of interest, a list of soil map units on the map and extent of each map unit, and cartographic symbols displayed on the map. Also presented are various metadata about data used to produce the map, and a description of each soil map unit.

## MAP INFORMATION

Map Scale: 1:1,740 if printed on A size (8.5" × 11") sheet.

The soil surveys that comprise your AOI were mapped at 1:24,000.

Please rely on the bar scale on each map sheet for accurate map measurements.

Source of Map: Natural Resources Conservation Service  
 Web Soil Survey URL: <http://websoilsurvey.nrcs.usda.gov>  
 Coordinate System: UTM Zone 15N NAD83

This product is generated from the USDA-NRCS certified data as of the version date(s) listed below.

Soil Survey Area: Jackson County, Missouri  
 Survey Area Data: Version 9, Jun 3, 2009

Date(s) aerial images were photographed: 7/6/2007

The orthophoto or other base map on which the soil lines were compiled and digitized probably differs from the background imagery displayed on these maps. As a result, some minor shifting of map unit boundaries may be evident.

## Map Unit Legend

Jackson County, Missouri (MO095)			
Map Unit Symbol	Map Unit Name	Acres in AOI	Percent of AOI
10137	Sibley-Urban land complex, 5 to 9 percent slopes	2.0	22.7%
60025	Urban land-Harvester complex, 2 to 9 percent slopes	5.9	68.4%
99033	Udarents-Urban land complex, 2 to 9 percent slopes	0.8	8.9%
<b>Totals for Area of Interest</b>		<b>8.7</b>	<b>100.0%</b>

## Map Unit Descriptions

The map units delineated on the detailed soil maps in a soil survey represent the soils or miscellaneous areas in the survey area. The map unit descriptions, along with the maps, can be used to determine the composition and properties of a unit.

A map unit delineation on a soil map represents an area dominated by one or more major kinds of soil or miscellaneous areas. A map unit is identified and named according to the taxonomic classification of the dominant soils. Within a taxonomic class there are precisely defined limits for the properties of the soils. On the landscape, however, the soils are natural phenomena, and they have the characteristic variability of all natural phenomena. Thus, the range of some observed properties may extend beyond the limits defined for a taxonomic class. Areas of soils of a single taxonomic class rarely, if ever, can be mapped without including areas of other taxonomic classes. Consequently, every map unit is made up of the soils or miscellaneous areas for which it is named and some minor components that belong to taxonomic classes other than those of the major soils.

Most minor soils have properties similar to those of the dominant soil or soils in the map unit, and thus they do not affect use and management. These are called noncontrasting, or similar, components. They may or may not be mentioned in a particular map unit description. Other minor components, however, have properties and behavioral characteristics divergent enough to affect use or to require different management. These are called contrasting, or dissimilar, components. They generally are in small areas and could not be mapped separately because of the scale used. Some small areas of strongly contrasting soils or miscellaneous areas are identified by a special symbol on the maps. If included in the database for a given area, the contrasting minor components are identified in the map unit descriptions along with some characteristics of each. A few areas of minor components may not have been observed, and consequently they are not mentioned in the descriptions, especially where the pattern was so complex that it was impractical to make enough observations to identify all the soils and miscellaneous areas on the landscape.

The presence of minor components in a map unit in no way diminishes the usefulness or accuracy of the data. The objective of mapping is not to delineate pure taxonomic classes but rather to separate the landscape into landforms or landform segments that have similar use and management requirements. The delineation of such segments

## Custom Soil Resource Report

on the map provides sufficient information for the development of resource plans. If intensive use of small areas is planned, however, onsite investigation is needed to define and locate the soils and miscellaneous areas.

An identifying symbol precedes the map unit name in the map unit descriptions. Each description includes general facts about the unit and gives important soil properties and qualities.

Soils that have profiles that are almost alike make up a *soil series*. Except for differences in texture of the surface layer, all the soils of a series have major horizons that are similar in composition, thickness, and arrangement.

Soils of one series can differ in texture of the surface layer, slope, stoniness, salinity, degree of erosion, and other characteristics that affect their use. On the basis of such differences, a soil series is divided into *soil phases*. Most of the areas shown on the detailed soil maps are phases of soil series. The name of a soil phase commonly indicates a feature that affects use or management. For example, Alpha silt loam, 0 to 2 percent slopes, is a phase of the Alpha series.

Some map units are made up of two or more major soils or miscellaneous areas. These map units are complexes, associations, or undifferentiated groups.

A *complex* consists of two or more soils or miscellaneous areas in such an intricate pattern or in such small areas that they cannot be shown separately on the maps. The pattern and proportion of the soils or miscellaneous areas are somewhat similar in all areas. Alpha-Beta complex, 0 to 6 percent slopes, is an example.

An *association* is made up of two or more geographically associated soils or miscellaneous areas that are shown as one unit on the maps. Because of present or anticipated uses of the map units in the survey area, it was not considered practical or necessary to map the soils or miscellaneous areas separately. The pattern and relative proportion of the soils or miscellaneous areas are somewhat similar. Alpha-Beta association, 0 to 2 percent slopes, is an example.

An *undifferentiated group* is made up of two or more soils or miscellaneous areas that could be mapped individually but are mapped as one unit because similar interpretations can be made for use and management. The pattern and proportion of the soils or miscellaneous areas in a mapped area are not uniform. An area can be made up of only one of the major soils or miscellaneous areas, or it can be made up of all of them. Alpha and Beta soils, 0 to 2 percent slopes, is an example.

Some surveys include *miscellaneous areas*. Such areas have little or no soil material and support little or no vegetation. Rock outcrop is an example.

## Jackson County, Missouri

### 10137—Sibley-Urban land complex, 5 to 9 percent slopes

#### Map Unit Setting

*Mean annual precipitation:* 33 to 41 inches

*Mean annual air temperature:* 50 to 55 degrees F

*Frost-free period:* 177 to 220 days

#### Map Unit Composition

*Sibley and similar soils:* 60 percent

*Urban land:* 35 percent

#### Description of Sibley

##### Setting

*Landform:* Ridges

*Landform position (two-dimensional):* Summit

*Landform position (three-dimensional):* Crest

*Down-slope shape:* Convex

*Across-slope shape:* Convex

*Parent material:* Loess

##### Properties and qualities

*Slope:* 5 to 9 percent

*Depth to restrictive feature:* More than 80 inches

*Drainage class:* Well drained

*Capacity of the most limiting layer to transmit water (Ksat):* Moderately high (0.20 to 0.57 in/hr)

*Depth to water table:* More than 80 inches

*Frequency of flooding:* None

*Frequency of ponding:* None

*Maximum salinity:* Nonsaline (0.0 to 2.0 mmhos/cm)

*Available water capacity:* High (about 12.0 inches)

##### Interpretive groups

*Land capability (nonirrigated):* 3e

*Other vegetative classification:* Grass/Prairie (Herbaceous Vegetation)

##### Typical profile

*0 to 26 inches:* Silt loam

*26 to 65 inches:* Silty clay loam

*65 to 80 inches:* Silt loam

#### Description of Urban Land

##### Setting

*Landform:* Ridges

*Landform position (two-dimensional):* Summit

*Landform position (three-dimensional):* Crest

## 60025—Urban land-Harvester complex, 2 to 9 percent slopes

### Map Unit Setting

*Mean annual precipitation:* 37 to 47 inches

*Mean annual air temperature:* 52 to 57 degrees F

*Frost-free period:* 184 to 228 days

### Map Unit Composition

*Urban land:* 50 percent

*Harvester and similar soils:* 40 percent

### Description of Urban Land

#### Interpretive groups

*Land capability (nonirrigated):* 8s

### Description of Harvester

#### Setting

*Landform:* Interfluves, hillslopes

*Landform position (two-dimensional):* Summit, shoulder

*Landform position (three-dimensional):* Interfluve, side slope

*Down-slope shape:* Linear, convex

*Across-slope shape:* Linear, convex

*Parent material:* Loess

#### Properties and qualities

*Slope:* 2 to 9 percent

*Depth to restrictive feature:* More than 80 inches

*Drainage class:* Moderately well drained

*Capacity of the most limiting layer to transmit water (Ksat):* Moderately high (0.20 to 0.57 in/hr)

*Depth to water table:* About 30 to 36 inches

*Frequency of flooding:* None

*Frequency of ponding:* None

*Maximum salinity:* Nonsaline (0.0 to 2.0 mmhos/cm)

*Available water capacity:* Moderate (about 8.7 inches)

#### Interpretive groups

*Land capability (nonirrigated):* 3e

*Other vegetative classification:* Trees/Timber (Woody Vegetation)

#### Typical profile

*0 to 7 inches:* Silt loam

*7 to 31 inches:* Silty clay loam

*31 to 80 inches:* Clay loam

## 99033—Udarents-Urban land complex, 2 to 9 percent slopes

### Map Unit Setting

*Elevation:* 720 to 1,050 feet

*Mean annual precipitation:* 33 to 43 inches

*Mean annual air temperature:* 46 to 57 degrees F

*Frost-free period:* 170 to 200 days

### Map Unit Composition

*Udarents and similar soils:* 50 percent

*Urban land:* 47 percent

### Description of Udarents

#### Setting

*Landform position (two-dimensional):* Shoulder, summit

*Landform position (three-dimensional):* Side slope, crest

*Down-slope shape:* Convex

*Across-slope shape:* Convex

*Parent material:* Mine spoil or earthy fill

#### Properties and qualities

*Slope:* 2 to 9 percent

*Depth to restrictive feature:* More than 80 inches

*Drainage class:* Somewhat poorly drained

*Capacity of the most limiting layer to transmit water (Ksat):* Moderately low to moderately high (0.14 to 0.57 in/hr)

*Depth to water table:* More than 80 inches

*Frequency of flooding:* None

*Frequency of ponding:* None

*Maximum salinity:* Nonsaline (0.0 to 2.0 mmhos/cm)

*Available water capacity:* Moderate (about 9.0 inches)

#### Interpretive groups

*Land capability (nonirrigated):* 6e

*Other vegetative classification:* Mixed/Transitional (Mixed Native Vegetation)

#### Typical profile

*0 to 5 inches:* Silt loam

*5 to 80 inches:* Silty clay loam

### Description of Urban Land

#### Setting

*Landform position (two-dimensional):* Backslope

*Across-slope shape:* Convex

#### Interpretive groups

*Land capability (nonirrigated):* 8
